pr-2-0-1-01	Liquid Technologies	18. Aug. 2005	Public Comment list	Technical	ProcessSpecificationReferenceType is not defined
pr-2-0-1-02	Stan Doherty, OASIS DITA	18. August. 2005	Note to editor (will be posted to Public Comment list)	Technical	Can the ebBP be used for internal processes or in relationship with them?
pr-2-0-1-03	Editor	22. August. 2005	PR Review (will be posted to Public Comment list)	Editorial	Ensure that metadata is correct for all Document artifact types. Editorial only.
pr-2-0-1-04	Stephen Green	13. Sept. 2005	Public Comment list	Editorial	Make the UBL instance available as an XML standalone file for use.
pr-2-0-1-05	Stephen Green	13. Sept. 2005	Public Comment list	Technical	Check use of name vs. nameID in UBL example. Correct if necessary. Ensure external roles also specified as intended.
pr-2-0-1-06	Stephen Green	13. Sept. 2005	Public Comment list	Technical	The datatype for the nameID's prevents the use of a urn here (colons not allowed it seems) so that forces one to put urns in 'name' attributes (except in the case of the 'uuid' attribute). That's a bit awkward for /Specification but arguably correct I suppose (a urn is a name after all).
pr-2-0-1-07	Liquid Technologies	18. Aug. 2005	Public Comment list	Technical	Transforms need more work (other than a starting example).
pr-2-0-1-08	Editor	19. Sept. 2005	Public Comment list	Technical	Evaluate what if any changes needed for BPMN examples, considering BPMN v1.1 proposed changes.

ID	Submitter (name and email address)	Submission Date	Submitted To (Email list)	Issue Type	Issue
pr-2-0-1-09	Kenji Nagahashi	12. Sept. 2005 (in person)	In person	Technical	Consider whether or not constraints, QoS, etc. should also exist on BT in addition to BTA.
pr-2-0-1-10	Cristiano Novelli	10. Oct. 2005	Public Comment list	Technical	1) To describe a BT that can happen zero or more times. 1A) Describe a optional BT (zero). 1B) Describe a recursive BT (more). 2) To describe two consecutive gateway.
