**Abstract:**

Describes a profile for Storage Arrays with Self-Encrypting Drives as KMIP clients interacting with KMIP servers

**Status:**

This document was last revised or approved by the OASIS Key Management Interoperability Protocol (KMIP) TC on the above date. The level of approval is also listed above. Check the "Latest version" location noted above for possible later revisions of this document.

Technical Committee members should send comments on this specification to the Technical Committee's email list. Others should send comments to the Technical Committee by using the "Send A Comment" button on the Technical Committee's web page at <https://www.oasis-open.org/committees/kmip/>.

For information on whether any patents have been disclosed that may be essential to implementing this specification, and any offers of patent licensing terms, please refer to the Intellectual Property Rights section of the Technical Committee web page (<https://www.oasis-open.org/committees/kmip/ipr.php>).

Copyright © OASIS Open 2014. All Rights Reserved.

All capitalized terms in the following text have the meanings assigned to them in the OASIS Intellectual Property Rights Policy (the "OASIS IPR Policy"). The full [Policy](#) may be found at the OASIS website.

This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to OASIS, except as needed for the purpose of developing any document or deliverable produced by an OASIS Technical Committee (in which case the rules applicable to copyrights, as set forth in the OASIS IPR Policy, must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by OASIS or its successors or assigns.

This document and the information contained herein is provided on an "AS IS" basis and OASIS DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

OASIS requests that any OASIS Party or any other party that believes it has patent claims that would necessarily be infringed by implementations of this OASIS Committee Specification or OASIS Standard, to notify OASIS TC Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the OASIS Technical Committee that produced this specification.

OASIS invites any party to contact the OASIS TC Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this specification by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the OASIS Technical Committee that produced this specification. OASIS may include such claims on its website, but disclaims any obligation to do so.

OASIS takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on OASIS' procedures with respect to rights in any document or deliverable produced by an OASIS Technical Committee can be found on the OASIS website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this OASIS Committee Specification or OASIS Standard, can be obtained from the OASIS TC Administrator. OASIS makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

The name "OASIS" is a trademark of [OASIS](#), the owner and developer of this specification, and should be used only to refer to the organization and its official outputs. OASIS welcomes reference to, and implementation and use of, specifications, while reserving the right to enforce its marks against misleading uses. Please see <https://www.oasis-open.org/policies-guidelines/trademark> for above guidance.

# 1 Introduction

For normative definition of the elements of KMIP see the [KMIP Specification](#) [KMIP-SPEC] and the [KMIP Profiles](#) [KMIP-PROF].

This profile defines the necessary KMIP functionality that a Storage Array with Self-Encrypting Drives operating as a KMIP client SHALL use and a KMIP server conforming to this profile SHALL support in order to interoperate in conformance with this profile.

## 1.1 Terminology

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

Authentication Key	A secret used by self-encrypting drives to verify authenticity of the client before allowing the drive to perform sensitive operations.
--------------------	---

## 40 2 Storage Array with Self-Encrypting Drives Profile

41 The Storage Array with Self-Encrypting Drives Profile is a storage array containing self-encrypting drives  
42 operating as a KMIP client interacting with a KMIP server.

### 43 2.1 Authentication Suite

44 Implementations conformant to this profile SHALL support at least one of the Authentication Suites  
45 defined within [KMIP-PROF]. The establishment of the trust relationship between the KMIP client and the  
46 KMIP server is the same as the defined base profiles for the version of the profile supported.

### 47 2.2 Storage Array with Self-Encrypting Drives - Client

48 KMIP clients conformant to this profile under [KMIP-SPEC-1\_0]:

- 49 1. SHALL conform to the [KMIP-SPEC-1\_0]

50 KMIP clients conformant to this profile under [KMIP-SPEC-1\_1]:

- 51 2. SHALL conform to the *Baseline Client Clause* (section 5.12) of [KMIP-PROF-1\_1]

52 KMIP clients conformant to this profile under [KMIP-SPEC-1\_2]:

- 53 3. SHALL conform to the *Baseline Client* (section 5.2) of [KMIP-PROF-1\_2]

54 KMIP clients conformant to this profile:

- 55 4. SHOULD NOT use a *Custom Attribute* [KMIP-SPEC] that duplicates information that is already in  
56 standard *Attributes* [KMIP-SPEC]

### 57 2.3 Storage Array with Self-Encrypting Drives - Server

58 KMIP servers conformant to this profile under [KMIP-SPEC-1\_0]:

- 59 1. SHALL conform to the *Conformance clauses for a KMIP Server* (section 12.1) of [KMIP-SPEC-  
60 1\_0]

61 KMIP servers conformant to this profile under [KMIP-SPEC-1\_1]:

- 62 2. SHALL conform to the *Baseline Server Clause* (section 5.2) of [KMIP-PROF-1\_1]

63 KMIP servers conformant to this profile under [KMIP-SPEC-1\_2]:

- 64 3. SHALL conform to the *Baseline Server* (section 5.1) of [KMIP-PROF-1\_2]

65 KMIP servers conformant to this profile SHALL:

- 66 4. SHALL support the following *Objects* [KMIP-SPEC]
  - 67 a. *Template* [KMIP-SPEC]
  - 68 b. *Secret Data* [KMIP-SPEC]
- 69 5. SHALL support the following *Attributes* [KMIP-SPEC]
  - 70 c. *Custom Attribute* [KMIP SPEC]
- 71 6. SHALL support the following client-to-server operations:
  - 72 d. *Register* [KMIP-SPEC]
- 73 7. SHALL support the following *Message Encoding* [KMIP-SPEC]:
  - 74 e. *Secret Data Type Enumeration* [KMIP-SPEC] value:
    - 75 i. Password
  - 76 f. *Object Type Enumeration* [KMIP-SPEC] values:
    - 77 i. Secret Data

- 78                   ii. Template
- 79           g. *Name Type Enumeration* [KMIP-SPEC] value:
- 80            i. Uninterpreted Text String
- 81   8. SHALL support *Custom Attribute* [KMIP-SPEC] with the following data types and properties:
- 82       h. TextString
- 83   9. SHALL support a minimum length of 64 characters for *Custom Attribute* [KMIP-SPEC] and *Name*
- 84       [KMIP-SPEC] values where the attribute type is of variable length.
- 85   10. SHALL support a minimum of 10 *Custom Attribute* [KMIP-SPEC] per managed object
- 86   11. SHALL support a minimum of 64 characters in *Custom Attribute* [KMIP-SPEC] names
- 87   12. MAY support any clause within [KMIP-SPEC] provided it does not conflict with any other clause
- 88       within this section 2.2
- 89   13. MAY support extensions outside the scope of this standard (e.g., vendor extensions,
- 90       conformance clauses) that do not contradict any KMIP requirements.

## 91 3 Storage Array with Self-Encrypting Drives Test 92 Cases

93 The test cases define a number of request-response pairs for KMIP operations. Each test case is  
94 provided in the XML format specified in [KMIP-ENCODE] intended to be both human-readable and usable  
95 by automated tools. The time sequence (starting from 0) for each request-response pair is noted and line  
96 numbers are provided for ease of cross-reference for a given test sequence.

97 Each test case has a unique label (the section name) which includes indication of mandatory (-M-) or  
98 optional (-O-) status and the protocol version major and minor numbers as part of the identifier.

99 The test cases may depend on a specific configuration of a KMIP client and server being configured in a  
100 manner consistent with the test case assumptions.

101 Where possible the flow of unique identifiers between tests, the date-time values, and other dynamic  
102 items are indicated using symbolic identifiers – in actual request and response messages these dynamic  
103 values will be filled in with valid values.

104 Note: the values for the returned items and the custom attributes are illustrative. Actual values from a real  
105 client system may vary as specified in section 4.7.

### 106 3.1 Mandatory Test Cases KMIP v1.0

#### 107 3.1.1 SASSED-M-1-10 - Configuration

108 Determine server configuration details including operations supported (only the mandatory operations are  
109 listed in the response example), objects supported (only the mandatory objects types are listed in the  
110 response example), and optional server information.

0045 </BatchItem>
0046 </ResponseMessage>

```

111

### 112 3.1.2 SASSED-M-2-10 - Register the authentication key

113 A template is created and the secret data for the authentication key is then registered. The server must  
114 allow the registration of managed objects for Object Groups either by allowed arbitrary values for Object  
115 Groups or by pre-configuration of specific Object Groups prior to the storage array registering the  
116 authentication key. The authentication key may be a new authentication key or a replacement  
117 authentication key.

118

## 124 3.2 Mandatory Test Cases KMIP v1.1

### 125 3.2.1 SASSED-M-1-11 - Configuration

126 Determine server configuration details including operations supported (only the mandatory operations are  
 127 listed in the response example), objects supported (only the mandatory objects types are listed in the  
 128 response example), and optional server information.

### 130 3.2.2 SASSED-M-2-11 - Register the authentication key

131 A template is created and the secret data for the authentication key is then registered. The server must  
 132 allow the registration of managed objects for Object Groups either by allowed arbitrary values for Object  
 133 Groups or by pre-configuration of specific Object Groups prior to the storage array registering the  
 134 authentication key. The authentication key may be a new authentication key or a replacement  
 135 authentication key.

## 142 3.3 Mandatory Test Cases KMIP v1.2

### 143 3.3.1 SASSED-M-1-12 - Configuration

144 Determine server configuration details including operations supported (only the mandatory operations are  
 145 listed in the response example), objects supported (only the mandatory objects types are listed in the  
 146 response example), and optional server information.

147

### 148 3.3.2 SASSED-M-2-12 - Register the authentication key

149 A template is created and the secret data for the authentication key is then registered. The server must  
 150 allow the registration of managed objects for Object Groups either by allowed arbitrary values for Object  
 151 Groups or by pre-configuration of specific Object Groups prior to the storage array registering the  
 152 authentication key. The authentication key may be a new authentication key or a replacement  
 153 authentication key.

## 160 4 Conformance

### 161 4.1 Storage Array with Self Encrypting Drive Client KMIP v1.0 Profile 162 Conformance

163 KMIP client implementations conformant to this profile:

- 164 1. SHALL support the Authentication Suite conditions ( 2.1)
- 165 2. SHALL support the Storage Array with Self-Encrypting Drives - Client conditions (2.2)
- 166 3. SHALL support all the Mandatory Test Cases KMIP v1.0 (3.1)

### 167 4.2 Storage Array with Self Encrypting Drive Client KMIP v1.1 Profile 168 Conformance

169 KMIP client implementations conformant to this profile:

- 170 1. SHALL support the Authentication Suite conditions ( 2.1)
- 171 2. SHALL support the Storage Array with Self-Encrypting Drives - Client conditions (2.2)
- 172 3. SHALL support all the Mandatory Test Cases KMIP v1.1 (3.2)

### 173 4.3 Storage Array with Self Encrypting Drive Client KMIP v1.2 Profile 174 Conformance

175 KMIP client implementations conformant to this profile:

- 176 1. SHALL support the Authentication Suite conditions ( 2.1)
- 177 2. SHALL support the Storage Array with Self-Encrypting Drives - Client conditions (2.2)
- 178 3. SHALL support all the Mandatory Test Cases KMIP v1.2 (3.3)

### 179 4.4 Storage Array with Self Encrypting Drive Server KMIP v1.0 Profile 180 Conformance

181 KMIP server implementations conformant to this profile:

- 182 1. SHALL support the Authentication Suite conditions ( 2.1)
- 183 2. SHALL support the Storage Array with Self-Encrypting Drives - Server conditions (2.3)
- 184 3. SHALL support all the Mandatory Test Cases KMIP v1.0 (3.1)

### 185 4.5 Storage Array with Self Encrypting Drive Server KMIP v1.1 Profile 186 Conformance

187 KMIP server implementations conformant to this profile:

- 188 1. SHALL support the Authentication Suite conditions ( 2.1)
- 189 2. SHALL support the Storage Array with Self-Encrypting Drives - Server conditions (2.3)
- 190 3. SHALL support all the Mandatory Test Cases KMIP v1.1 (3.2)

### 191 4.6 Storage Array with Self Encrypting Drive Server KMIP v1.2 Profile 192 Conformance

193 KMIP server implementations conformant to this profile:

- 194 1. SHALL support the Authentication Suite conditions ( 2.1)
- 195 2. SHALL support the Storage Array with Self-Encrypting Drives - Server conditions (2.3)
- 196 3. SHALL support all the Mandatory Test Cases KMIP v1.2 (3.3)

## 197 4.7 Permitted Test Case Variations

198 Whilst the test cases provided in this Profile define the allowed request and response content, some  
199 inherent variations MAY occur and are permitted within a successfully completed test case.

200 Each test case MAY include allowed variations in the description of the test case in addition to the  
201 variations noted in this section.

202 Other variations not explicitly noted in this Profile SHALL be deemed non-conformant.

### 203 4.7.1 Variable Items

204 An implementation conformant to this Profile MAY vary the following values:

- 205 1. UniqueIdentifier
- 206 2. PrivateKeyUniqueIdentifier
- 207 3. PublicKeyUniqueIdentifier
- 208 4. UniqueBatchItemIdentifier
- 209 5. AsynchronousCorrelationValue
- 210 6. TimeStamp
- 211 7. KeyValue / KeyMaterial including:
  - 212 a. key material content returned for managed cryptographic objects which are generated by
  - 213 the server
  - 214 b. wrapped versions of keys where the wrapping key is dynamic or the wrapping contains
  - 215 variable output for each wrap operation
- 216 8. For response containing the output of cryptographic operation in Data / SignatureData/ MACData  
217 / IVCounterNonce where:
  - 218 a. the managed object is generated by the server; or
  - 219 b. the operation inherently contains variable output
- 220 9. For the following DateTime attributes where the value is not specified in the request as a fixed  
221 DateTime value:
  - 222 a. ActivationDate
  - 223 b. ArchiveDate
  - 224 c. CompromiseDate
  - 225 d. CompromiseOccurrenceDate
  - 226 e. DeactivationDate
  - 227 f. DestroyDate
  - 228 g. InitialDate
  - 229 h. LastChangeDate
  - 230 i. ProtectStartDate
  - 231 j. ProcessStopDate
  - 232 k. ValidityDate
  - 233 l. OriginalCreationDate
- 234 10. LinkedObjectIdentifier
- 235 11. DigestValue

- 236 a. For those managed cryptographic objects which are dynamically generated
- 237 12. KeyFormatType
- 238 a. The key format type selected by the server when it creates managed objects
- 239 13. Digest
- 240 a. The HashingAlgorithm selected by the server when it calculates the digest for a managed
- 241 object for which it has access to the key material
- 242 b. The Digest Value
- 243 14. Extensions reported in Query for ExtensionList and ExtensionMap
- 244 15. Application Namespaces reported in Query
- 245 16. Object Types reported in Query other than those noted as required in this profile
- 246 17. Operation Types reported in Query other than those noted as required in this profile (or any
- 247 referenced profile documents)
- 248 18. For TextString attribute values containing test identifiers:
- 249 a. Additional vendor or application prefixes
- 250 19. Additional attributes beyond those noted in the response

251

252 An implementation conformant to this Profile MAY allow the following response variations:

- 253 1. Object Group values – May or may not return one or more Object Group values not included in
- 254 the requests
- 255 2. y-CustomAttributes – May or may not include additional server-specific associated attributes not
- 256 included in requests
- 257 3. Message Extensions – May or may not include additional (non-critical) vendor extensions
- 258 4. TemplateAttribute – May or may not be included in responses where the Template Attribute
- 259 response is noted as optional in [KMIP-SPEC]
- 260 5. AttributeIndex – May or may not include Attribute Index value where the Attribute Index value is 0
- 261 for Protocol Versions 1.1 and above.
- 262 6. ResultMessage – May or may not be included in responses and the value (if included) may vary
- 263 from the text contained within the test case.
- 264 7. The list of Protocol Versions returned in a DiscoverVersion response may include additional
- 265 protocol versions if the request has not specified a list of client supported Protocol Versions.
- 266 8. VendorIdentification - The value (if included) may vary from the text contained within the test
- 267 case.

## 268 4.7.2 Variable behavior

269 An implementation conformant to this Profile SHALL allow variation of the following behavior:

- 270 1. A test MAY omit the clean-up requests and responses (containing Revoke and/or Destroy) at the
- 271 end of the test provided there is a separate mechanism to remove the created objects during
- 272 testing.
- 273 2. A test MAY omit the test identifiers if the client is unable to include them in requests. This
- 274 includes the following attributes:
- 275 a. Name; and
- 276 b. x-ID
- 277 3. A test MAY perform requests with multiple batch items or as multiple requests with a single batch
- 278 item provided the sequence of operations are equivalent
- 279 4. A request MAY contain an optional *Authentication* [KMIP\_SPEC] structure within each request

280

## Appendix C. Revision History

Revision	Date	Editor	Changes Made
wd01	21-May-2013	Tim Hudson / Mahadev Karadigudda	Converted from draft proposal to OASIS template with minor rewording and inclusion of references to KMIP 1.2 documents
wd02	25-June-2013	Tim Hudson	Updated test cases and changed how multiple versions of the specification are referenced and added test cases for all versions.
wd03	6-August-2013	Tim Hudson	Updated to include Permitted Test Case Variations and updated Test Cases based on July 2013 Interop
wd04	10-August-2013	Tim Hudson	Updated Permitted Test Case Variations
wd04a	24-October-2013	Tim Hudson	Editorial update to include VendorIdentification in the list of allowed variations as per TC motion.
pr01update	11-June-2014	Tim Hudson	Updated following Public Review
