As below the descriptions for `invocation.startTimeUtc` and `invocation.endTimeUtc` should refer to the `invocation` and not the `run` instance. This correction was likely missed when we created the notion of multiple invocations to represent a single run (moving the relevant UTC properties to the invocation type).

"description": "The Coordinated Universal Time (UTC) date and time at which the run started

@lgolding, FYI

Author

We may consider updating descriptions for the `invocation machine`, `processId` and `workingDirectory` descriptions as well.
