**[WSCALENDAR-571] conformance targets not well-defined**

- **Status:** Applied
- **Project:** OASIS Web Services Calendar (WS-Calendar) TC
- **Component/s:** MIN
- **Affects Version/s:** MIN CSDPR01
- **Fix Version/s:** MIN WD07
- **Type:** Bug
- **Priority:** Major
- **Reporter:** Toby Considine
- **Assignee:** William Cox
- **Resolution:** Fixed
- **Labels:** None
- **Environment:** TAB Review

**Resolution:**

Defined two conformance targets as follows:

1. Conformance of an application to PIM
2. Conformance of a specification to PIM

Note that the term implementation may apply to both an application that uses MIN and a specification that extends or otherwise reuses PIM.

This clarifies the "implementations and specifications" concept, and is more specific.

**Description**

The conformance targets or possible implementations that are subject to conformance are not well defined: we read "Implementations and specifications " in the conformance clause. These need be defined even if only intuitively. What is the difference between Implementations and specifications ? Can we use another term than "specifications" which is rather overloaded (also used for "this specifications" - are we talking of different classes of specifications?). At some other place we read "an application or specification..." - needs be defined too in this context. The base specification (PIM V1.0) also uses "specifications" as conformance target, but not defined.

**Comments**

Comment by William Cox [08/Mar/16]

Cross reference to PIM issue: WSCALENDAR-572

Comment by William Cox [09/May/16]

Back port this notion to PIM which has a similar but not identical set of issues in WSCALENDAR-572.

**[WSCALENDAR-570] non-normative content recommended/required in conformance clause**

- **Status:** Applied
- **Project:** OASIS Web Services Calendar (WS-Calendar) TC
- **Component/s:** MIN
- **Affects Version/s:** MIN CSDPR01
- **Fix Version/s:** MIN WD07
- **Type:** Bug
- **Priority:** Major
- **Reporter:** Toby Considine
- **Assignee:** William Cox
- **Resolution:** Fixed
- **Labels:** None
- **Environment:** TAB Review

**Resolution:**

Reword to eliminate SHOULD; the sections of PIM are non-normative. Added note mentioning that precision is addressed in XSD.

**Description**

https://issues.oasis-open.org/sr/jira.issueviews:searchrequest-fullcontent/temp/SearchRequest.html?jqlQuery=project%3D%22OASIS%20Web%20Services%20Calendar%20(TC)%22%20AND%20(resolved%3Dtrue%20OR%20status%3Dapplied%20OR%20status%3Dnew)%20AND%20project%3D%22OASIS%20Web%20Services%20Calendar%20(WS-Calendar) TC%22%20AND%20summary%3D%22conformance%20targets%20not%20well-defined%22%20AND%20summary%3D%22non-normative%20content%20recommended/required%22
In MIN conformance clause we read: "This non-normative section SHOULD be considered by conforming implementations and specifications".

[WSCALENDAR-569] Various Ungrammatical and Awkward bits

Status: Resolved
Project: OASIS Web Services Calendar (WS-Calendar) TC
Component/s: MIN
Affects Version/s: MIN CSDPR01
Fix Version/s: MIN WD08

Type: Improvement
Priority: Minor
Reporter: Toby Considine
Assignee: Toby Considine
Resolution: Fixed
Labels: None
Environment: Toby Considine

Proposal: Fix as suggested

Description
Line 74 space in uri
Line 105 Capitalization
Line 107 Fix sentence
Line 115 Effects / re-scheduling, etc
Line 142 "Everything is calendar related" – In what?
Line 177 Capitalize "Fully Bind" to imply normative use
Line 201 – 203: Up until this section language is…odd
Line 231: Alternately is ☐ Alternately, if
