66 OASIS requests that any OASIS Party or any other party that believes it has patent claims that would
67 necessarily be infringed by implementations of this OASIS Committee Specification or OASIS Standard, to
68 notify OASIS TC Administrator and provide an indication of its willingness to grant patent licenses to such
69 patent claims in a manner consistent with the IPR Mode of the OASIS Technical Committee that produced
70 this specification.

71 OASIS invites any party to contact the OASIS TC Administrator if it is aware of a claim of ownership of any
72 patent claims that would necessarily be infringed by implementations of this specification by a patent
73 holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR
74 Mode of the OASIS Technical Committee that produced this specification. OASIS may include such claims
75 on its website, but disclaims any obligation to do so.

76 OASIS takes no position regarding the validity or scope of any intellectual property or other rights that
77 might be claimed to pertain to the implementation or use of the technology described in this document or
78 the extent to which any license under such rights might or might not be available; neither does it represent
79 that it has made any effort to identify any such rights. Information on OASIS' procedures with respect to
80 rights in any document or deliverable produced by an OASIS Technical Committee can be found on the
81 OASIS website. Copies of claims of rights made available for publication and any assurances of licenses
82 to be made available, or the result of an attempt made to obtain a general license or permission for the
83 use of such proprietary rights by implementers or users of this OASIS Committee Specification or OASIS
84 Standard, can be obtained from the OASIS TC Administrator. OASIS makes no representation that any
85 information or list of intellectual property rights will at any time be complete, or that any claims in such list
86 are, in fact, Essential Claims.
