Comment Resolution Log

The table summarizes the comments that were received during the 15-day public review of the committee specification draft "Common Security Advisory Framework Version 2.0" and their resolution. Comments came to the csaf-comment and the CSAF TC mailing lists. The public review did start 15 April 2022 at 00:00 UTC and did end 29 April 2022 at 23:59 UTC.

A status of "Completed" in the Disposition column indicates that the editors have implemented the changes on which the TC decided, which are outlined in the Resolution column. It also is a hyperlink to the GitHub commit notice.

The item number is a hyperlink to the issue number in this OASIS TC CASF repository at https://github.com/oasis-tcs/csaf/.

Evaluation of Feedback

The editors consider above public comments as well as other more editorial feedback documented in issue(s) ... and classified/considered per pull request ... as **Non-Material** per OASIS TC process.

A motion has been issued during the TC meeting by Stefan Hagen on 2022-05-18 to promote the resulting revised work products to CS02 including non-material changes only.

To ease verification by anyone and to support the administration a separate release candidate archive containing the 4 standards track work products will be created and linked to this issue as well as noted in the motion as annotation in the minutes of meeting.
