Abstract:

EDXL-HAVE (HAVE) is an XML messaging standard primarily for exchange of information related to health facilities in the context of emergency management. HAVE supports sharing information about facility services, bed counts, operations, capacities, and resource needs so first responders, emergency managers, coordinating organizations, hospitals, care facilities, and the health community can provide each other with a coherent view of the health system.

Status:

This document was last revised or approved by the OASIS Emergency Management TC on the above date. The level of approval is also listed above. Check the "Latest version" location noted above for possible later revisions of this document. Any other numbered Versions and other technical work produced by the Technical Committee (TC) are listed at https://www.oasis-open.org/committees/tc_home.php?wg_abbrev=emergency#technical.

TC members should send comments on this specification to the TC's email list. Others should send comments to the TC's public comment list, after subscribing to it by following the instructions at the "[Send A Comment](#)" button on the TC's web page at <https://www.oasis-open.org/committees/emergency/>.

This Committee Specification Public Review Draft is provided under the RF on RAND Terms Mode of the OASIS IPR Policy, the mode chosen when the Technical Committee was established. For information on whether any patents have been disclosed that may be essential to implementing this specification, and any offers of patent licensing terms, please refer to the Intellectual Property Rights section of the TC's web page (<https://www.oasis-open.org/committees/emergency/ipr.php>).

Note that any machine-readable content (Computer Language Definitions) declared Normative for this Work Product is provided in separate plain text files. In the event of a discrepancy between any such plain text file and display content in the Work Product's prose narrative document(s), the content in the separate plain text file prevails.

1 Introduction

EDXL-HAVE specifies an XML document format that allows the communication of the status of a hospital, its services, and its resources. These include bed capacity and availability, emergency department status, available service coverage, and the status of its facility and operations.

[All text is normative unless otherwise labeled]

1.0 IPR Policy

This Committee Specification Public Review Draft is provided under the RF on RAND Terms Mode of the OASIS IPR Policy, the mode chosen when the Technical Committee was established.

For information on whether any patents have been disclosed that may be essential to implementing this specification, and any offers of patent licensing terms, please refer to the Intellectual Property Rights section of the TC's web page (<https://www.oasis-open.org/committees/emergency/ipr.php>).

1.1 Terminology

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

1.2 Normative References

NOTE: Many of these references are used as or in relation to imported schema for the Normative XML Schema for EDXL-HAVE-v2.0 available separately: <http://docs.oasis-open.org/emergency/edxl-have/v2.0/csprd02/schemas/edxl-have-v2.0.xsd>. (See “Additional artifacts [CAP-1,” on front page.)

1.4 Purpose

The ongoing goal of the Emergency Data eXchange Language (EDXL) project is to facilitate emergency information sharing and data exchange across the local, state, tribal, national, international and non-governmental organizations of different professions that provide emergency response and management services. EDXL accomplishes this goal by focusing on the standardization of specific messages (messaging interfaces) to facilitate emergency communication and coordination particularly when more than one profession or governmental jurisdiction is involved.

The current roster of published EDXL Standards includes:

- The Common Alerting Protocol v1.2 specification (EDXL-CAP), with various dedicated profiles
- The Distribution Element specification v2.0 (EDXL-DE)
- The Hospital AVailability Exchange specification v1.0 (EDXL-HAVE)
- The Tracking of Emergency Patients specification v1.1 (EDXL-TEP)
- The Resource Messaging specification v1.0 (EDXL-RM)
- The Situation Reporting specification v1.0 (EDXL-SitRep)
- The Tracking of Emergency Client v1.0 (EDXL-TEC)

The primary purpose of EDXL-HAVE is to provide an XML-based reporting format that allows information to be shared about a set of health facilities including the communication of the status of a health facility, its services, and its resources. These include bed capacity and availability, emergency department status, staffing levels, available service coverage, and the status of a health facilities operations and resources.

The primary audience for EDXL-HAVE is the broad community that interacts with health facilities and it is intended to be used as a tool to automate information flow in and out of the health network. It is not intended to be a tool used for internal administration of health facilities as other standards organizations (e.g. Health System Level Seven International – www.hl7.org) already handle this domain.

1.5 History

In a disaster or emergency situation, there is a need for hospitals to be able to communicate with each other, and with other members of the emergency response community. The ability to exchange data in regard to hospitals' bed availability, status, services, and capacity enables both hospitals and other emergency agencies to respond to emergencies and disaster situations with greater efficiency and speed. In particular, it will allow emergency dispatchers and managers to make sound logistics decisions -such

as where to route victims, and automatically determining which hospitals have the ability to provide the needed service. Many hospitals have expressed the need for, and indeed are currently using, commercial or self-developed information technology that allows them to publish this information to other hospitals in a region, as well as Emergency Operations Centers (EOCs), 9-1-1 centers, and Emergency Medical Systems (EMS) responders via a Web-based tool.

The Hospital Availability Exchange standard was created to make sharing information about the state of hospitals for day-to-day and crisis use. Initially it was focused purely on hospitals but it has been extended to handle sharing information about the broader health network, including long-term care facilities, urgent care clinics, and temporary aid centers.

HAVE 1.0 was released on 22DEC2009. Since the release of HAVE 1.0 there have been multiple operational uses of HAVE, including after the 2010 Haiti Earthquake. In many of the operational uses there were modified schema used to add services that were not in HAVE 1.0 and to convey other aspects of the data and to handle the sharing of information about non-hospital facilities (e.g. clinics, temporary locations). The use of the HAVE 1.0 standard was encouraging but the shortfalls needed to be addressed. To that end, in 2010 the OASIS EM-TC voted to re-open the HAVE standard with the goal of creating a HAVE 2.0 standard.

The HAVE data exchange standard goes hand in hand with the EDXL Tracking of Emergency Patients (TEP). A TEP-based data exchange collects data on patients from incident EMS first encounter and field hospital triage to EMS transport and patient registration at a definitive care facility such as a hospital emergency room. It can also be used for the routine transport of patients and for the evacuation of hospitals involving EMS transport and care. In all scenarios, it relieves the heavy administrative burden levied on staff to re-key patient information, often after the fact, enabling automatic and pro-active hospital preparedness. In September of 2016, a bidirectional transformation specification between TEP and HL7 messaging was completed. This enables the transformation of the TEP data taken by emergency response to automatically populate in hospital data systems.

HAVE supports the TEP standard by providing the data needed about available hospital resources to enable the informed routing decisions needed by EMS. In this way, the patients can be routed to the hospital with the facilities needed to support their needs. Given the TEP, the emergency room will be able to see the data about the incoming patient in order to best prepare for their optimal care. Both of these initiatives began with the Department of Homeland Security Science and Technology (DHS S&T) effort to identify the next most important data standards needed for emergency response. Practitioners in both the medical and emergency management domains were included in developing draft specifications after many facilitated sessions to include scenario working groups.

The National Association of Emergency Medical Services Officials (NASEMSO) is one organization that participated in the DHS S&T effort. In October 2015, NASEMSO issued a resolution to encourage the completion and implementation of the TEP and HAVE standards.

The DHS S&T effort concluded with two live exercises utilizing both TEP and HAVE (see next section).

The HAVE 2.0 will be coordinated with HL7 through the work of the Patient Administration Work Group. OASIS and HL7 intend to release a joint specification for the HAVE Standard under the Statement of Understanding between the organizations. The effective exchange and common data interoperability will enable both hospitals and other emergency agencies to respond to emergencies and disaster situations with greater efficiency and speed.

The TEP and HAVE Standards Have Been Proven Successful in Live Exercises

The draft TEP standard was successfully implemented by four independent systems: Tennessee's state EMS system and a local EMS system in Memphis, the state of Maryland EMS system, and the federal JPATS system. The Integrated Public Alerts and Warnings System (IPAWS) was plugged in as the message broker (the "post office" that routes data traffic where users need). State, local and federal agencies proved that these standards-based data exchanged work by plugging into existing major live-actor patient movement exercises at disaster sites, aircraft bases and hospitals.

- During a 2010 National Disaster Medical System (NDMS) patient movement exercise in Tennessee, data following patient movement from Maryland to Tennessee was exchanged in real time between the Maryland EMS system to JPATS then to the Tennessee State and Memphis EMS systems. All systems displayed the current data as if updates were completed directly in their system. EM Systems was used to compile and aggregate HAVE data from 3 different hospitals, which was used by emergency managers to route patients to the most appropriate destinations with the availability, capabilities and staff to provide care.
- Simultaneously with the FEMA National Level Exercise (NLE) in 2011, five states cooperated to track patient movement across them employing five different patient tracking systems. All systems, some commercially available and some home-grown, were able to track the data updates in their own systems.

At the 2012 Integrated Medical, Public Health, Preparedness and Response Training Summit, presenters from the DHS S&T Practitioner Steering Group moved volunteer patients through the room to different "states" and were able to display data updates across four independent systems including JPATS.

In these exercises and the 2012 demonstration, as each existing system automatically scanned, entered or updated patient data, that data was automatically shared in near real-time behind the scenes with no manual intervention, allowing users to view and report data in their own systems as if all data updates were made there. Using an aggregation of multiple hospital HAVE reports, emergency managers were able to route patients to appropriate destinations.

1.6 Structure of the EDXL Hospital Availability Exchange Specification

The EDXL-HAVE 2.0 standard document structure is defined using successively more detailed or constrained artifacts in the form of textual descriptions, diagrams, figures, tables and Appendices. The EDXL-HAVE XML Schema is provided separately. The overall structure of the EDXL-HAVE report is first represented in an Element Reference Model (ERM). The ERM is the foundation from which individual constraint schemas (individual situation report types) are defined.

The structure of the EDXL-HAVE standard is defined in the following sections:

- Section 2 summarizes the design principles of the standard and shows several usage scenarios;
- Section 3 provides an informal overview of EDXL-HAVE. In particular:
 - Section 3.1 presents an extensive definition of a HAVE report;
 - Section 3.2 describes essential supporting elements in the EDXL Common Types collection, including the use of EDXL Extensions;
 - Section 3.3 presents the Element Reference Model (ERM) which shows the abstract structural relationships of the main components of EDXL-HAVE;
 - Section 3.4 discusses how the distribution requirements for EDXL-HAVE messages may be met through several mechanisms, including EDXL-Distribution Element (DE) and as general data payloads;
 - Section 3.5 presents a summary of the elements that make up a HAVE message.
- Section 4 The Data Dictionary formally defines each element contained in the EDXL-HAVE standard message.
- Section 5 provides conformance information.

These sections together define the message structure, message element definitions, optionality and cardinality.

2 Design Principles & Concepts (non-normative)

Below are some of the guiding principles behind the development of EDXL-HAVE:

- Support day-to-day and crisis use of the standard.
- Facilitate sharing of information amongst the general public, all levels of government, first nation/tribal, international, and non-governmental organizations.
- Provide a simple information report that allows first responders, emergency managers, community leaders, politicians, and other stakeholders to get a quick glimpse of the state of the health network in a community.
- Provide a non-invasive way for a health facility to keep the communities that they serve abreast of developments that impact their ability to provide care.
- Be respectful of the boundaries of internal health facility information and the information that is relevant externally.
- Separation of EDXL-HAVE reports from being tied to a particular method of delivery.
- Use and reuse of data, content, and models developed by other initiatives that align with EDXL-HAVE.
- Provide a baseline set of services, operations, and resources to allow health facilities to start using HAVE quickly, while allowing for controlled extension where warranted.

2.1 Requirements for Design

The OASIS EM-TC tasked the EDXL-HAVE Sub-committee to review HAVE 1.0 and propose Errata, Minor, and Major versions. The initial tasking provided the following guidance:

EM EDXL-HAVE Sub-committee (EMHAVE)

Scope of Work

After initial implementation of EDXL-HAVE by various parties, comments have been generated that identify potential improvement and revisions to the EDXL-HAVE standard. The EDXL-HAVE Sub-committee (EMHAVE) will request and examine existing comments regarding the EDXL-HAVE 1.0 standard with the aim of producing updates to the EDXL-HAVE standard including Errata, Minor or Major versions.

Purpose

The subcommittee will research, analyze, recommend, and organize currently available information on implementation challenges or comments regarding the EDXL-HAVE standard version 1.0.

Deliverables

1. The EMHAVE subcommittee will produce recommendations for additional errata, minor revisions, or major revisions to the EDXL-HAVE standard.
2. Production of applicable committee draft documents based on the findings of #1
3. Schemas, examples, and additional documentation to support #2

Schedule

Q2 - '10 – Request for comments for EDXL-HAVE. Analysis of comments to produce Deliverable #1

Q4 - '10 – Production of deliverables #2 & #3

EM EDXL-HAVE Sub-committee (EMHAVE)

Scope of Work

After initial implementation of EDXL-HAVE by various parties, comments have been generated that identify potential improvement and revisions to the EDXL-HAVE standard. The EDXL-HAVE Sub-committee (EMHAVE) will request and examine existing comments regarding the EDXL-HAVE 1.0 standard with the aim of producing updates to the EDXL-HAVE standard including Errata, Minor or Major versions.

Purpose

The subcommittee will research, analyze, recommend, and organize currently available information on implementation challenges or comments regarding the EDXL-HAVE standard version 1.0.

Deliverables

1. The EMHAVE subcommittee will produce recommendations for additional errata, minor revisions, or major revisions to the EDXL-HAVE standard.
2. Production of applicable committee draft documents based on the findings of #1
3. Schemas, examples, and additional documentation to support #2

Q2 - '10 – Request for comments for EDXL-HAVE. Analysis of comments to produce Deliverable #1

Q4 - '10 – Production of deliverables #2 & #3

Figure 1 - EM EDXL-HAVE SC Scope

2.2 Example Usage Scenarios

The following scenarios illustrate how EDXL-HAVE 2.0 can be used in the field.

2.2.1 Day-to-Day – Dialysis Patient:

On a routine pickup a social worker picks up an elderly patient that needs routine maintenance. Normally the dialysis is performed at the closest facility, but the social worker knows that the small facility's dialysis unit is not operating due to an equipment failure. A quick query to view the local health facilities presents several within a 20-minute drive, so the social worker places a call and coordinates with one of the alternate facilities.

2.2.2 First Responder – Responding with Critical Care

As the result of a multi-unit residential fire, ambulances are dispatched and the Incident Commander indicates that there are 2 critical and 3 serious burn victims. The nearest hospital can only take in 2 burn victims normally, but the current state of the burn unit is not known. By examining the state of the local facilities, officials can coordinate which victims are to be taken to the surrounding health facilities.

2.2.3 Mass-Scale Vaccination Clinics

Under pandemic conditions a community is implementing a vaccination program with the hospitals, urgent care clinics, private clinics, and temporary clinics providing vaccinations. The public, key officials, and the media can have immediate visibility into the wait times and service availability at each of the vaccination sites. EDXL-HAVE provides the ability to display service availability for each facility, referenced on a map, by colour code and to provide an indication of wait times if they are available.

2.2.4 Disaster Response:

Following a major earthquake in the developing world, NGOs, various government responders, and local officials (and non-officials) establish temporary health-care facilities to meet the urgent and non-urgent health needs of those injured or killed by the earthquake and ensuing issues. Coordination of multiple dimensions are critical: what services are available, what is the capacity of the facilities, what resources they are missing or can share, where are the facilities located, who are the official points of contacts, what agency is running the facility, what are the hours operation, etc.

As the event unfolds there is a Cholera outbreak due to damaged sanitation. There is a clear need identified to track 2 particular services (e.g. Cholera Vaccination and Cholera Treatment) that were too specific to be part of the default HAVE 2.0 services taxonomy. After a meeting of the coordinating agencies, the data being shared is extended to include Cholera Vaccination and Cholera Treatment services, including the standard metrics (capacity, colour code for status, etc.)

3 EDXL HAVE

Section 3 of this Standard is **normative unless otherwise stated**. If any differences are found between any XML schema and its associated model, diagram, table or other artifact or text, then the XML schema shall always take precedence and the other artifact(s) must be changed to match the XML schema.

Note: Please report any such errors to OASIS.

3.1 HAVE Report Definition (non-normative)

The HAVE Report is a single EDXL message that is intended to provide sharing of the services, operations, and capacities of health facilities. Health facilities in HAVE include hospitals, urgent care clinics, temporary facilities, and other facilities that may provide health services for a community.

Typical actors:

- Senders – hospital administrators, hospital networks, health providers, NGOs, clinic administrators, and emergency medical services, etc.
- Recipients – first responders, dispatch operators, emergency managers, automated systems, etc.

3.2 Supporting Elements (non-normative)

3.2.1 Common Types

Supporting Element Types borrow re-usable elements from the EDXL Common Types (ct:) that apply to and support multiple areas of the HAVE 2.0 reports, such as Location. For instance incidentLocation relies on ct:EDXLLocationType, which consists of either EDXLGeoLocation for geographical information or EDXLGeoPoliticalLocation for geopolitical information. EDXLGeoLocation is of type edxl-gsf:EDXLGeoLocationType and EDXLGeoPoliticalLocation is of type ct:EDXLGeoPoliticalLocationType. This latter type consists of either a GeoCode (of type ct:ValueListType) or an Address (of type edxl-ciq:xAL:AddressType).

The following elements are used in this specification and can be found at the locations cited in the normative references in Section 1.2 of this document.

Supporting Element/Type	Defined In
ct:EDXLDateTimeType	EDXL-CT (Simple Types)
ct:EDXLStringType	EDXL-CT (Simple Types)
ct:ValueListURIType	EDXL-CT (Simple Types)
ct:ValueType	EDXL-CT (Simple Types)
ct:ValueListType	EDXL-CT (Complex Types)
ct:ValueKeyType	EDXL-CT (Complex Types)
ct:EDXLGeoPoliticalLocationType	EDXL-CT (Complex Types)
ct:EDXLLocationType	EDXL-CT (Complex Types)
gsf:EDXLGeoLocationType	EDXL-GSF
ct:ValueListURI	EDXL-CT (Top Level Elements)

Supporting Element/Type	Defined In
xal:addressType	EDXL-CIQ

317

318 Some elements of the common type "ct:EDXLStringType" are denoted as [token] in the accompanying
319 XML per the following reference:

320 [token] N. Freed, XML Schema Part 2: Datatypes Second Edition, [http://www.w3.org/TR/xmlschema-](http://www.w3.org/TR/xmlschema-2/#token)
321 [2/#token](http://www.w3.org/TR/xmlschema-2/#token), W3C REC-xmlschema-2, October 2004.

322 The definition for token as found in the OASIS common types is: "The value space of **token** is the set of
323 strings that do not contain the carriage return (#xD), line feed (#xA) nor tab (#x9) characters, that have no
324 leading or trailing spaces (#x20) and that have no internal sequences of two or more spaces."

325 The implication is that the XML parser will change string entries to remove carriage returns, line feeds, tab
326 characters, leading or trailing spaces, and internal sequences of two or more spaces.

327 3.2.2 Selecting Values from Lists

328 The ValueList and ValueKey types are part of the EDXL Common Types collection. They allow standards
329 adopters to use topic specific lists of values for elements such as externalCode alternateCodeValue, etc..
330 Both types have identical structure, but ValueList allows for selection of multiple values [1..*] in the list,
331 whereas ValueKey allows for selection of only one [1..1] value in the list.

332 When using a ValueList / ValueKey structure the user can specify a user-defined list by URI (either using
333 the "urn:..." format or the more familiar "http://..." format) and then include user-defined values from that
334 list. This structure has several advantages: (a) it provides flexibility for local communities to use
335 community-defined terms and vocabulary; (b) it allows for the external maintenance of local or
336 standardized lists; and (c) it avoids the problems inherent in attempting to constantly update hard-coded
337 enumerations in a specification.

338 An existing vetted list should be referenced for defaults, but users could also reference their own value list

339 3.2.3 ValueKeyType

340 The schema for ValueKeyType is defined as

```
341 <xs:complexType name="ValueKeyType">
342   <xs:sequence>
343     <xs:element ref="ct:ValueListURI" minOccurs="1" maxOccurs="1"/>
344     <xs:element ref="ct:Value" minOccurs="1" maxOccurs="1"/>
345   </xs:sequence>
346 </xs:complexType>
```

347 and its application to the XML description of an element *elementName* of type ct:ValueKeyType would be:

```
348 <elementName>
349   <ct:ValueListURI>valueListURI</ct:ValueListURI>
350   <ct:Value>value</ct:Value>
351 </elementName>
```

352 This example uses a published list of values and definitions and selects one specific entry to describe a
353 resource need of a facility:

- 354 o valueListURI = <https://www.medwish.org/give/medical-supplies/>
- 355 o value = Bandages

356 which stands for
 357
 358 <resourceKind>
 359 <ct:ValueListURI>https://www.medwish.org/give/medical-supplies/</ct:ValueListURI>
 360 <ct:Value>Bandages</ct:Value>
 361 </resourceKind>
 362
 363 Following the approach in ValueList, we'd point ValueListURI to some other list to make a different
 364 selection of eye colors available.

365 3.2.4 EDXL Extensions

366 HAVE 2.0 supports supplemental inclusion of community-defined sets of name/value pairs, referred to
 367 here as "Community Extensions" or simply "Extensions" for short. For example, the HAVE Status
 368 element contains a stability field, which indicates if the status is stable, improving, or deteriorating. The
 369 "Extension" concept would allow a sender to augment this information with a qualifier, such as "rapidly" or
 370 "slowing", providing finer grain detail on the situation. The "Community Extensions" concept solves
 371 several major problems for improving information sharing and developing standards for the emergency
 372 management community. First, the nature of emergencies is that the unexpected will happen and
 373 emergency managers need flexibility to send whatever information is needed. Second, an emergency
 374 begins and often stays local, so local authorities and users need control to send the information they
 375 decide is important to address the current emergency. Third, communities need the opportunity to explore
 376 potential new standards. The parameter name/value extension mechanism, along with the registration
 377 and best practice guidance, provides an on-ramp for communities to determine what works well for them.
 378 The Community Extensions that are most successful can be incorporated formally into future standards.

379
 380 Typical needs are:

- 381 1. Standard augmentation: community adds new information that is associated with the EDXL
 382 standard. Examples: adding HL7 translation information to the HAVE payload.
- 383 2. List augmentation: community adds new values (enumerations) to the default set of values in the
 384 standard. Example: adding community-specific information to the ServiceType element.

385
 386 In HAVE 2.0, "Extensions" are used under the following elements:

- 387 • ServiceType
- 388 • ResourceInformationType
- 389 • OperationType
- 390 • OffloadInfoType
- 391 • TraumaCenterLevelType

392
 393 The schema for Extension is defined as
 394 <xs:element name="extension">
 395 <xs:complexType>
 396 <xs:sequence>
 397 <xs:element name="community" type="xs:anyURI" />
 398 <xs:element name="id" type="xs:anyURI" />
 399 <xs:element name="parameter" type="ext:ParameterType"
 400 maxOccurs="unbounded"/>
 401 </xs:sequence>

402 </xs:complexType>

403 </xs:element>

404 and its application to the XML description of an extension would be:

405 <extension>

406 <community>communityURI</community>

407 <id>idURI</id>

408 <parameter>

409 <nameURI>nameURI</nameURI>

410 <value>some value</value>

411 </parameter>

412 </extension>

413 This example uses a qualify for status stability for a service:

414

- *community* = facility:service:status:refined

415

- *id* = extension:1

416

- *parameter-nameURI* = have:service:status

417

- *parameter-value* = Rapidly

418 which stands for

419

420 <extension>

421 <community>facility:service:status:refined</community>

422 <id>extension:1</id>

423 <parameter>

424 <nameURI>have:service:status</nameURI>

425 <value>Rapidly</value>

426 </parameter>

427 </extension>

428

3.4 Distribution of EDXL-HAVE (non-normative)

HAVE messages are intended to be payloads of various messaging and/or delivery systems. Messaging systems such as EDXL-DE can treat a HAVE message as a payload. Similarly, non-message-based systems (e.g. RESTful web service) can deliver a HAVE message just as easily. An individual facility may provide an up-to-date report via a web service. An aggregator could poll the facilities that are of interest for a particular reason, or in a Publish-Subscribe scenario, subscribe to the facilities of interest.

3.5 HAVE Elements

A HAVE message consists of an organization that uniquely identifies the organization that is responsible for the reporting facilities, a reporting period (**reportingPeriod** – *optional*) that identifies reporting period applicable for this HAVE report, and a group of elements (**facility** – *required*) that uniquely identifies and describes the facility's status including

- facility name and location,
- overall facility status, ..
- services, ..
- operations, ..
- resources, ..
- staffing, ..
- and emergency department.

These elements are detailed further in the Element Reference Model (Section 3.3) and in the Data Dictionary (Section 4).

4 Data Dictionary

This Data Dictionary specifically references the document [EDXL HAVE Requirements 12232005](https://www.oasis-open.org/committees/document.php?document_id=16400&wg_abbrev=emergency) publicly available at https://www.oasis-open.org/committees/document.php?document_id=16400&wg_abbrev=emergency. Appendix A contains a computer-generated PDF that is generated directly from the XML Schema document.

This is the source to which the 'Requirements Supported' row in each element entry refers. Since the Requirements are numbered, we cite the Requirement number that the entry supports.

4.1.1 HAVE

Element	HAVE
Type	xs:complexType
Usage	REQUIRED , MUST be used once and only once
Definition	Top Level item for Hospital AVailability Exchange (HAVE) message.
Comments	<ul style="list-style-type: none">Provides context to the HAVE report
Sub-elements	<ul style="list-style-type: none">organizationInformationreportingPeriodfacilityremarks
Requirements Supported	Requirement Number 1.

Element	organizationInformation
Type	OrganizationInformationType [xpil:OrganisationDetailsType]
Usage	REQUIRED , MUST be used once and only once
Definition	Information of the Organization that is responsible for the reporting of these facilities.
Comments	<ul style="list-style-type: none">Based on [xpil:OrganisationDetailsType]
Constraints	Specific information includes: <ul style="list-style-type: none">OrganisationNameAddresses

	<ul style="list-style-type: none"> • ContactNumbers • ElectronicAddressIdentifiers • OrganisationInfo
Requirements Supported	Requirement Numbers 1, 2.

463

Element	reportingPeriod
Type	edxl-ct:TimePeriodType
Usage	OPTIONAL , MAY be used once and only once
Definition	The reporting period applicable for the HAVE root element and called the "current reporting period" typically a 24-hr period but the duration may change for operational reasons. If blank the assumption is that the file is for "today" - local to the issuer.
Comments	• _____
Constraints	Must use <ul style="list-style-type: none"> • fromDateTime • toDateTime
Requirements Supported	Requirement Numbers 1, 8.

464

Element	facility
Type	FacilityType
Usage	REQUIRED , MAY be used more than once
Definition	A list of facilities that comprise the detail of this HAVE message.
Comments	• _____
Constraints	• _____
Requirements Supported	Requirement Numbers 1, 3.

465

Element	remarks
-------------------------	-------------------------

<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	<u>OPTIONAL</u> , MAY be used more than once
<u>Definition</u>	<u>Provides context to the HAVE report.</u>
<u>Comments</u>	• <u> </u>

474

<u>Element</u>	<u>geoLocation</u>
<u>Type</u>	<u>GeoLocationType (restriction base: edxl-gsf:EDXLGeoLocationType)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The single geometry that represents the Facility location. A WGS84 SRS element is mandatory. Alternate SRS geometry elements can be provided. If alternate geometry elements are provided they should reflect the same physical location.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u>MUST include a <wgs84Location> element</u> <ul style="list-style-type: none"> • <u>SRS attribute MUST be “http://www.opengis.net/def/crs/EPSSG/0/4326”.</u> • <u>MAY include one or more <geoLocationExtended> elements.</u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 10.</u>

475

476

<u>Element</u>	<u>status</u>
<u>Type</u>	<u>StatusType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The overall status of the Facility. This value is intended to provide a high-level summary status of the Facility from the perspective of the person responsible for the Facility. The particulars driving that Facility status should be provided where appropriate (Services, Operations, etc.). Comments (comment element) should be used to provide only the high-level summary.</u>

<u>Comments</u>	<ul style="list-style-type: none"> • <u>Please see the StatusType definition, including sub-element details, for full explanation and guidance on this data type</u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 11, 15, 16, 17, 18.</u>

477

<u>Element</u>	<u>services</u>
<u>Type</u>	<u>ServicesType</u>
<u>Usage</u>	<u>REQUIRED, MUST</u> be used once and only once
<u>Definition</u>	<u>Container element of all the elements of service coverage. This includes both the necessary staff and facilities. Indicator of the availability of specialty service coverage.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 5, 11, 15, 16, 17, 18.</u>

478

<u>Element</u>	<u>futureServices</u>
<u>Type</u>	<u>FutureServicesType</u>
<u>Usage</u>	<u>OPTIONAL, MAY</u> be used more than once
<u>Definition</u>	<u>Optional list of Service Capabilities in future for planned or ramping up (or down) of capabilities to accomodate surge needs or degraded capabilities. 0...n</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 5, 11, 15, 16, 17, 18.</u>

479

<u>Element</u>	<u>activityInPeriod</u>
<u>Type</u>	<u>ActivityInPeriodType</u>

<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	Provides a set of summaries of activity that has occurred in the indicated reporting period. This item is intended to provide a very high-level of facility activity.
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	Requirement Numbers 1, 3, 5, 8, 11, 15, 16, 17, 18.

480

<u>Element</u>	<u>operations</u>
<u>Type</u>	<u>OperationsType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	Provides a taxonomy-based list of operations that describe the operations of the Facility. Operations are the inward-facing capabilities that a Facility requires to run (e.g. HVAC, power, quarantine, Emergency Operations Centre).
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	Requirement Numbers 1, 3.

481

<u>Element</u>	<u>resourceInformation</u>
<u>Type</u>	<u>ResourceInformationType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	Staffing provides an indication of the staffing status and any needs or offers of this facility.
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	Requirement Numbers 1, 3, 4, 5, 11, 12, 15, 16, 17, 18.

482

<u>Element</u>	<u>staffing</u>
<u>Type</u>	<u>ResourceInformationType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	<u>Staffing provides an indication of the staffing status and any needs or offers of this facility.</u>
<u>Comments</u>	<u>•</u>
<u>Constraints</u>	<u>•</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 11, 12, 15, 17, 18.</u>

483

<u>Element</u>	<u>emergencyDepartment</u>
<u>Type</u>	<u>EmergencyDepartmentType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Report on the emergency department status for the organization.</u>
<u>Comments</u>	<u>•</u>
<u>Constraints</u>	<u>•</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 11.</u>

484

<u>Element</u>	<u>traumaCenter</u>
<u>Type</u>	<u>TraumaCenterType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Type of the trauma center for the organization.</u>
<u>Comments</u>	<u>•</u>
<u>Constraints</u>	<u>•</u>
<u>Requirements</u>	<u>Requirement Numbers 1, 3, 11, 17.</u>

<u>Supported</u>	
------------------	--

485

<u>Element</u>	remarks
<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	OPTIONAL , MAY be used once and only once
<u>Definition</u>	Provides context to the FacilityType..
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u> <u>Supported</u>	Requirement Numbers 1, 2, 3, 5, 6, 11, 17, 19.

486

<u>Attribute</u>	ID
<u>Type</u>	xs:ID
<u>Usage</u>	REQUIRED , MUST be used once and only once
<u>Definition</u>	A unique identifier for this Facility. This value should be unique globally, but MUST be unique from the sender perspective.
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u> <u>Supported</u>	Requirement Number 1, 3.

487

<u>Attribute</u>	parentID
<u>Type</u>	xs:IDREF
<u>Usage</u>	OPTIONAL , MAY be used once and only once.
<u>Definition</u>	Reference to the ID of the Facility that is the parent (owner, manager, responsible, etc.) of this Facility. This field is optional and used to provide hierarchy for formal facility organizations.
<u>Comments</u>	• <u> </u>

<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Number 1, 3.</u>

488

489 4.1.3 BedCapacityType

<u>Element</u>	<u>BedCapacityType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Top level complex schema type defining bed capacity counts (available/baseline) given a specific type of bed.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u>availableCount</u> • <u>baselineCount</u> • <u>comment</u>
<u>Requirements Supported</u>	<u>Requirement Number 1, 13, 14.</u>

490

<u>Element</u>	<u>availableCount</u>
<u>Type</u>	<u>xs:integer</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The number of vacant/available beds to which patients can be immediately supported. These must include supporting space, equipment, medical material, ancillary and support services and staff to operate under normal circumstances. These beds are licensed, physically available and have staff on hand to attend to the patient who occupies the bed. NEGATIVE values means the service is operating beyond normal capacity.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u>	<u>Requirement Number 1, 13, 14.</u>

<u>Supported</u>	
------------------	--

491

<u>Element</u>	<u>baselineCount</u>
<u>Type</u>	<u>xs:integer</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>The maximum (baseline) number of beds in this category.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u> <u>Supported</u>	<u>Requirement Numbers 1, 13, 14.</u>

492

<u>Element</u>	<u>remarks</u>
<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Provides context for the BedCapacityType.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u> <u>Supported</u>	<u>Requirement Numbers 1, 2, 3, 5, 6, 11, 17, 19.</u>

493

494 **4.1.4 StabilityType**

<u>Element</u>	<u>StabilityType</u>
<u>Type</u>	<u>xs:simpleType (restriction base: xs:string)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Indication of stability - positive/improving, negative/deteriorating, neutral/stable.</u>

<u>Comments</u>	• <u> </u>
<u>Constraints</u>	<p><u>MUST use one of the following values:</u></p> <ul style="list-style-type: none"> • <u>stable -- Stable/unchanging - conditions remain within norms and are not out of normal patterns</u> • <u>improving -- Conditions are improving towards normal</u> • <u>deteriorating -- Conditions are deviating negatively from normal</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 6, 11, 15, 16, 17, 18.</u>

4.1.5 OffLoadKind Element

<u>Element</u>	<u>OffLoadKind</u>
<u>Type</u>	<u>xs:simpleType (restriction base: xs:token)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<p><u>MUST use one of the following values:</u></p> <ul style="list-style-type: none"> • <u>land</u> • <u>air</u> • <u>other</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18.</u>

4.1.6 OffloadStateKind Element

<u>Element</u>	<u>OffloadStateKind</u>
<u>Type</u>	<u>xs:simpleType (restriction base: xs:token)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<p><u>MUST use one of the following values:</u></p> <ul style="list-style-type: none"> • <u>normal</u> • <u>delayed</u>

<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18.</u>

499

500

4.1.7 OffloadType

<u>Element</u>	<u>OffloadType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Indicator of offload times of ambulance capabilities. The time it takes transfer care of a patient to hospital staff, thereby freeing the transport for assignment.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u>kind</u> • <u>offloadMinutes</u> • <u>offloadState</u> • <u>offloadColourCode</u> • <u>remarks</u>

506

507 **4.1.8 OrganizationInformationType**

<u>Element</u>	<u>OrganizationInformationType</u>
<u>Type</u>	<u>xs:complexType [xpil:OrganisationDetailsType]</u>
<u>Usage</u>	<u>REQUIRED, MUST be used more than once</u>
<u>Definition</u>	<u>The container element for organization information elements.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 9, 10.</u>

508

509 **4.1.9 StatusType**

<u>Element</u>	<u>StatusType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Complex Type to provide status information: OK (yes/no), colour code, Stability, and commentary.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	• <u> </u> isOK

	<ul style="list-style-type: none"> <u>colourStatus</u> <u>stability</u> <u>comments</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 11, 12, 15, 16, 17.</u>

510

<u>Element</u>	<u>isOK</u>
<u>Type</u>	<u>xs:boolean</u>
<u>Usage</u>	<u>REQUIRED, MUST</u> be used once and only once
<u>Definition</u>	<u>Is the service/capability available/functioning/adequate? True = yes, false = no.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 11, 12, 15, 16, 17.</u>

511

<u>Element</u>	<u>colourStatus</u>
<u>Type</u>	<u>ColourStatusType</u>
<u>Usage</u>	<u>OPTIONAL, MAY</u> be used once and only once
<u>Definition</u>	<u>Colour (text-based) of the status. By default triage colours of green, yellow, orange, red, black are supported. Element colourStatus can apply to Facility, Services, and Operations.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 11, 12, 15, 16, 17.</u>

512

<u>Element</u>	<u>stability</u>
<u>Type</u>	<u>StabilityType</u>

<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Indication that the Status is stable, improving, or deteriorating</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	<u>MUST use one of the following values:</u> <ul style="list-style-type: none"> • <u>stable -- Stable/unchanging - conditions remain within norms and are not out of normal patterns</u> • <u>improving -- Conditions are improving towards normal</u> • <u>deteriorating -- Conditions are deviating negatively from normal</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 11, 12, 15, 16, 17.</u>

513

<u>Element</u>	<u>remarks</u>
<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Provides context to the OffloadType</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 5, 6, 11, 17, 19.</u>

514

515

<u>Element</u>	<u>comments</u>
<u>Type</u>	<u>FreeTextType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Provides context to StatusType.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>

<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 5, 6, 11, 17, 19.</u>
-------------------------------	---

4.1.10 ServiceType

<u>Element</u>	<u>ServiceType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Extensible Service Type for providing detail on a health Service that the Facility provides</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u> name</u> • <u> code</u> • <u> status</u> • <u> externalCode</u> • <u> bedCapacity</u> • <u> capacity</u> • <u> remarks</u> • <u> ref="ext:extension"</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 5, 6, 11, 12, 15, 16, 17, 18, 19.</u>

<u>Element</u>	<u>name</u>
<u>Type</u>	<u>FreeTextType [LimitedString (restriction base: xs:string)]</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The human-readable name of the service that is being described.</u>
<u>Comments</u>	• <u> </u>

<u>Constraints</u>	•
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 11, 12, 15, 16, 17.</u>

521

522

<u>Element</u>	<u>code</u>
<u>Type</u>	<u>xs:simpleType (restriction base: ServiceCodeDefaultType)</u>
<u>Usage</u>	<u>REQUIRED, must be used once and only once</u>
<u>Definition</u>	<u>See ServiceCodeDefaultType</u>
<u>Comments</u>	•
<u>Constraints</u>	•
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 11, 12, 15, 16, 17.</u>

523

524

<u>Element</u>	<u>status</u>
<u>Type</u>	<u>StatusType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Describes the status of the service.</u>
<u>Comments</u>	• <u>Please see the StatusType definition, including sub-element details, for full explanation and guidance on this data type.</u>
<u>Constraints</u>	•
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 5, 6, 11, 12, 15, 16, 17, 18, 19.</u>

525

526

<u>Element</u>	<u>externalCode</u>
<u>Type</u>	<u>edxl-ct:ValueKeyType</u>

<u>Usage</u>	<u>OPTIONAL, MAY be more than once</u>
<u>Definition</u>	<u>Allows an external system to place its own equivalent code for the service.code value. This allows external systems to correlate their data directly in the HAVE report.</u>
<u>Comments</u>	<u>•</u>
<u>Constraints</u>	<u>•</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 11, 12, 15, 16, 17.</u>

527

528

<u>Element</u>	<u>bedCapacity</u>
<u>Type</u>	<u>BedCapacityType</u>
<u>Usage</u>	<u>OPTIONAL, MUST be used once and only once</u>
<u>Definition</u>	<u>An indication of the bed capacity that the facility makes available for the community to know. It reflects fully staffed and equipped beds. intention here is to provide an external view of where beds may be available in health network. The intent is not for HAVE to become a hospital administration tool.</u>
<u>Comments</u>	<u>•</u>
<u>Constraints</u>	<u>•</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 13, 14.</u>

529

530

<u>Element</u>	<u>capacity</u>
<u>Type</u>	<u>CapacityType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Indicates the capacity status of this particular service..</u>
<u>Comments</u>	<u>•</u>
<u>Constraints</u>	<u>•</u>
<u>Requirements</u>	<u>Requirement Numbers 1, 13, 14.</u>

<u>Supported</u>	
------------------	--

531

<u>Element</u>	<u>remarks</u>
<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Textual description of Service situation.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u> <u>Supported</u>	<u>Requirement Numbers 1, 2, 3, 5, 6, 11, 13, 14, 17, 19.</u>

532

533

<u>Element</u>	<u>ext:extension See Section 3.2.4 EDXL Extensions</u>
<u>Type</u>	
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	<u>Provides extensibility for adding elements to the ServiceType</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements</u> <u>Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 14, 16.</u>

534

535

536 **4.1.11 ResourceInformationType**

<u>Element</u>	<u>ResourceInformationType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>

<u>Definition</u>	<u>Complex Type to be used for tracking Resource state (status, needs, offers). Allows extension to handle specific information that is non-HAVE (e.g. NIEM payloads, lookups for interoperability with other systems).</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u>status</u> • <u>needs</u> • <u>offers</u> • <u>remarks</u> • <u>ext:extension</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 11, 12, 15, 16, 17, 18.</u>

537

538

<u>Element</u>	<u>status</u>
<u>Type</u>	<u>StatusType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once.</u>
<u>Definition</u>	<u>Overall resource status of the facility.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u>Please see the StatusType definition, including sub-element details, for full explanation and guidance on this data type.</u>
<u>Constraints</u>	• <u> </u>

<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>A reference to more detailed information about the capacity of the service.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 13, 14.</u>

561

562 **4.1.16 TriageCountType**

<u>Element</u>	<u>TriageCountType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>The number of each triage patient type the overall hospital currently has by colour code</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	• <u> code</u>

	<ul style="list-style-type: none"> • <u>count</u> • <u>alternateCodeValue</u> • <u>comment</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

563

<u>Element</u>	<u>code</u>
<u>Type</u>	<u>TriageColourCodeType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<p><u>Triage Colour Codes (RED, YELLOW, GREEN, BLACK, none) for capacity purposes. The list of values must be from the list identified in TriageCodeListURN.</u></p> <p><u>Default Values</u></p> <ul style="list-style-type: none"> • <u>red: Number of victims with immediate needs</u> • <u>yellow: Number of victims with delayed needs</u> • <u>green: Number of victims with minor needs</u> • <u>black: Number of deceased victims.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u>If a TriageCountType/code value is specified, a TriageCountType/count element must be specified.</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 6.</u>

564

<u>Element</u>	<u>count</u>
<u>Type</u>	<u>xs:int</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>The number of patients of this code type.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Requirements</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

<u>Supported</u>	
------------------	--

565

<u>Element</u>	<u>alternateCodeValue</u>
<u>Type</u>	<u>edxl-ct:ValueKeyType</u>
<u>Usage</u>	OPTIONAL , MAY be used once more than once
<u>Definition</u>	There are a large number of Triage systems in use. Many use numbering systems (http://en.wikipedia.org/wiki/Triage#Tags) and colours. The premise of HAVE is that we will share the general state with the broad emergency community who may not know the intimate details of a triage system, but understand the general concepts that Red=urgent, Green=walking wounded, Black=Dead/Lost (already dead or untreatable). The alternateCodeValues element is intended to be used by these systems. Providing the ValueListURI and Value will mapping of external systems to the base HAVE Triage colour codes.
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 6.</u>

566

<u>Element</u>	<u>remarks</u>
<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	OPTIONAL , MUST be used once and only once
<u>Definition</u>	<u>Provides context for the TriageCountType</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 5, 6, 11, 12, 15, 16, 17, 18, 19.</u>

567

568

4.1.17 ActivityInPeriodType

<u>Element</u>	<u>ActivityInPeriodType</u>
----------------	-----------------------------

<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>ActivityInPeriodType gathers information about the admissions, discharges, and deaths in a time period</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u>reportingPeriod</u> • <u>admissions</u> • <u>discharges</u> • <u>deaths</u> • <u>remarks</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 8.</u>

569

<u>Element</u>	<u>reportingPeriod</u>
<u>Type</u>	<u>edxl-ct:TimePeriodType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>The time period (From -- To) that the activity occurred in. If this element is not included the reportingPeriod at the Facility level should be assumed to define the time range.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	<u>Must use</u> <ul style="list-style-type: none"> • <u>fromDateTime</u> • <u>toDateTime</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 8.</u>

570

<u>Element</u>	<u>admissions</u>
<u>Type</u>	<u>xs:int</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>

<u>Definition</u>	<u>Number of admissions in the period.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

571

<u>Element</u>	<u>discharges</u>
<u>Type</u>	<u>xs:int</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Number of Discharges in the period.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

572

<u>Element</u>	<u>deaths</u>
<u>Type</u>	<u>xs:int</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Number of Deaths in the period.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

573

<u>Element</u>	<u>remarks</u>
<u>Type</u>	<u>edxl-ct:RemarksType</u>

<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>General comment/summary of the activity in period.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 5, 6, 11, 12, 15, 16, 17, 18, 19.</u>

574

575 **4.1.18 TriageColourCodeType**

<u>Element</u>	<u>TriageColourCodeType</u>
<u>Type</u>	<u>xs:simpleType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>MUST use one of the following values</u> <ul style="list-style-type: none"> • <u>red (RED Triage - Immediate attention for Triage.)</u> • <u>yellow (YELLOW Triage - Needs medical attention after RED/Immediate.)</u> • <u>green (GREEN Triage - Walking wounded or self-treatable.)</u> • <u>black (BLACK Triage - Lost/Dead.)</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

576

577 **4.1.19 FreeTextType**

<u>Element</u>	<u>FreeTextType</u>
<u>Type</u>	<u>LimitedString</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>A restricted text block for preserving whitespace but limiting length to 1024 characters based on the "LimitedString" type. Intended to discourage lengthy descriptions.</u>
<u>Comments</u>	• <u> </u>

<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u>defaultText</u> • <u>alternateText</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

578

<u>Element</u>	<u>defaultText</u>
<u>Type</u>	<u>LimitedString</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Text in the language specified by the HAVE message's defaultLanguage attribute.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

579

<u>Element</u>	<u>alternateText</u>
<u>Type</u>	<u>AlternateTextType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	<u>Text in alternate language, for use when the language is other than that specified by the defaultLanguage tag of the root HAVE element.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u>Supports multiple languages in addition to the default language of the HAVE message.</u> • <u>The meaning of the alternateText should be a translation of the defaultText element.</u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

580

4.1.20 AlternateTextType

Element	<u>AlternateTextType</u>
Type	<u>xs:complexType</u>
Usage	<u>See Usage for elements of type AlternateTextType.</u>
Definition	<u>Allows for non default language to be used and is a LimitedString language attribute for this element. Attribute value for language MUST comply with RFC3066.</u>
Comments	<u>•</u>
Constraints	<u>•</u>
Requirements Supported	<u>Requirement Numbers 1, 3, 4, 5, 6, 11.</u>

4.1.21 FacilityOperationKind Element

Element	<u>FacilityOperationKind</u>
Type	<u>xs:simpleType (restriction base: xs:token)</u>
Usage	<u>REQUIRED, MUST be used once and only once</u>
Definition	<u>Must use one of the following:</u> <ul style="list-style-type: none"><u>plant (Plant - the key equipment and capabilities needed to operate the facility (e.g. HVAC, cafeteria).)</u><u>security (Security operations for facility (e.g. patrol, surveillance).)</u><u>staffing (Staff-related operations (e.g. medical personnel, support staffing, administrative).)</u><u>emergency (Emergency Department operations.)</u>
Comments	<u>•</u>
Constraints	<u>•</u>
Requirements Supported	<u>Requirement Numbers 1, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.</u>

4.1.22 OperationType

Element	<u>OperationType</u>
----------------	----------------------

<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Gathers information about a particular operation type including the kind (taxonomy driven), name (human readable representations), status, and commentary.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u> name</u> • <u> status</u> • <u> remarks</u> • <u> ext:extension</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.</u>

586

<u>Element</u>	<u>kind</u>
<u>Type</u>	<u>FacilityOperationKind</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The high-level kind of operation that is being reported on (plant, security, staffing, or emergency).</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.</u>

587

<u>Element</u>	<u>name</u>
<u>Type</u>	<u>FreeTextType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The name of the operation that is being reported on (e.g. "Food Services").</u>
<u>Comments</u>	• <u> </u>

<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.</u>

588

<u>Element</u>	<u>status</u>
<u>Type</u>	<u>StatusType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The status of the Operation.</u>
<u>Comments</u>	• <u>Please see the StatusType definition, including sub-element details, for full explanation and guidance on this data type.</u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.</u>

589

<u>Element</u>	<u>remarks</u>
<u>Type</u>	<u>edxl-ct:RemarksType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>General comment/summary on the Operation.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 2, 3, 4, 5, 6, 11, 12, 15, 16, 17, 18, 19.</u>

590

<u>Element</u>	<u>ext:extension See Section 3.2.4 EDXL Extensions</u>
<u>Type</u>	
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>

<u>Definition</u>	<u>Used to add elements to the OperationType</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 14, 16.</u>

591

592 **4.1.23 ColourCodeDefaultType**

<u>Element</u>	<u>ColourCodeDefaultType</u>
<u>Type</u>	<u>xs:simpleType (restriction base: edxl-ct:EDXLStringType)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>MUST use one of the following</u> <ul style="list-style-type: none"> • <u>red (RED - severe/extreme deviation from normal condition. Marks a noted exception from normal conditions.)</u> • <u>yellow (YELLOW - moderate deviation from normal condition but not at SEVERE/EXTREME level.)</u> • <u>green (GREEN - normal conditions.)</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18.</u>

593

594 **4.1.24 FacilityKindType**

<u>Element</u>	<u>FacilityKindType</u>
<u>Type</u>	<u>xs:simpleType (restriction base: edxl-ct:EDXLStringType)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>MUST use one of the following</u> <ul style="list-style-type: none"> • <u>Hospital</u> • <u>longTermCare</u> • <u>urgentCareClinic</u> • <u>temporaryFacility</u> • <u>other</u>

<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.</u>

595

596

4.1.25 TraumaCenterLevelKind

<u>Element</u>	<u>TraumaCenterLevelKind</u>
<u>Type</u>	<u>xs:simpleType (restriction base: xs:token)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>MUST use one of the following</u> <ul style="list-style-type: none"> • <u>level1 (Level 1 Trauma Services.)</u> • <u>level2 (Level 2 Trauma Services.)</u> • <u>level3 (Level 3 Trauma Services.)</u> • <u>no trauma (Level 4 Trauma Services.)</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18.</u>

597

4.1.26 LimitedString

<u>Element</u>	<u>LimitedString</u>
<u>Type</u>	<u>xs:simpleType (restriction base: xs:string)</u>
<u>Usage</u>	<u>OPTIONAL, MUST be used once and only once</u>
<u>Definition</u>	<u>Text block for preserving whitespace but limiting length to 1024 characters.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u>xs:whitespace = "0"</u> • <u>xs:maxLength = "1024"</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11, 15, 16, 17.</u>

598

599

4.1.27 GeoLocationType

<u>Element</u>	<u>GeoLocationType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>Used to provide accurate geospatial information about location.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Constraints</u>	<ul style="list-style-type: none"> • <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u> wgs84Location</u> • <u> geoLocationExtended</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 5, 10.</u>

600

<u>Element</u>	<u>wgs84Location</u>
<u>Type</u>	<u>xs:complexType (extension base: edxl-gsf:EDXLGeoLocationType)</u>
<u>Usage</u>	<u>REQUIRED, MUST be used once and only once</u>
<u>Definition</u>	<u>The location of the facility in WGS84 coordinates. The values in this element must use the WGS84 (EPSG:4326) values. This element is mandatory to ensure compatibility globally. If alternate SRS are needed, use the geoLocationExtended elements to support 1 or more SRS that are needed in your community. FUTURE versions of HAVE may support additional or alternate globally supported SRS.</u>
<u>Comments</u>	<ul style="list-style-type: none"> • <u> srsName attribute is set to a fixed value of http://www.opengis.net/def/crs/EPSSG/0/4326</u> • <u> srsName is the GML Spatial Reference System Name.</u>
<u>Constraints</u>	
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 5, 10.</u>

601

<u>Element</u>	<u>geoLocationExtended</u>
----------------	----------------------------

<u>Type</u>	<u>xs:complexType (extension base: edxl-gsf:EDXLGeoLocationType)</u>
<u>Usage</u>	<u>OPTIONAL</u> , MAY be used more than once
<u>Definition</u>	<u>The location of the facility in non-WGS84 (EPSG:4326) coordinates. These alternate (and optional) coordinates are intended for the purposes of systems that require the sending system to provide specialize SRS coordinates.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> attribute srsName is required</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 5, 10.</u>

602

603 **4.1.28 TrafficStatusKind**

<u>Element</u>	<u>TrafficStatusKind</u>
<u>Type</u>	<u>xs:simpleType (restriction base: xs:token)</u>
<u>Usage</u>	<u>REQUIRED</u> , MUST be used once and only once
<u>Definition</u>	<u>MUST use one of the following</u> <ul style="list-style-type: none"> • <u> normal (Traffic is at levels that are within norms.)</u> • <u> advisory (Traffic levels are high enough to warrant notifying the that the facility is experiencing higher than expected traffic.</u> • <u> closed (Facility is not accepting patient traffic.)</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 11, 12, 15, 16, 17, 18.</u>

604

605 **4.1.29 OffloadInfoType**

<u>Element</u>	<u>OffloadInfoType</u>
<u>Type</u>	<u>xs:complexType</u>
<u>Usage</u>	<u>REQUIRED</u> , MUST be used once and only once

<u>Definition</u>	<u>Provides information about offload.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Sub-elements</u>	<ul style="list-style-type: none"> • <u>offload</u> • <u>ext:extension</u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18.</u>

606

<u>Element</u>	<u>offload</u>
<u>Type</u>	<u>OffloadType</u>
<u>Usage</u>	<u>REQUIRED, MAY be used more than once</u>
<u>Definition</u>	<u>The particular offload mode, status, and other information for the facility.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18.</u>

607

<u>Element</u>	<u>ext:extension See Section 3.2.4 EDXL Extensions</u>
<u>Type</u>	
<u>Usage</u>	<u>OPTIONAL, MAY be used more than once</u>
<u>Definition</u>	<u>Used to add elements to the OffloadInfoType</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 5, 6, 14, 16.</u>

608

4.1.30 EmergencyDepartmentType

Element	<u>EmergencyDepartmentType</u>
Type	<u>xs:complexType</u>
Usage	<u>REQUIRED, MUST be used once and only once</u>
Definition	<u>The container of all of the elements related to the emergency department status. It describes the ability of this emergency department to treat patients.</u>
Comments	• <u> </u>
Constraints	• <u> </u>
Sub-elements	<ul style="list-style-type: none"> • <u>status</u> • <u>offloadInfo</u> • <u>traffic</u> • <u>triageCapacity</u>
Requirements Supported	<u>Requirement Numbers 1, 3, 4, 5, 6, 11, 13, 14, 17, 18.</u>

609

Element	<u>status</u>
Type	<u>StatusType</u>
Usage	<u>REQUIRED, MUST be used once and only once</u>
Definition	<u>Status of the Emergency Department.</u>
Comments	<ul style="list-style-type: none"> • <u>Please see the StatusType definition, including sub-element details, for full explanation and guidance on this data type.</u>
Constraints	• <u> </u>
Requirements Supported	<u>Requirement Numbers 1, 3, 11, 15, 16, 17, 18.</u>

610

Element	<u>offloadInfo</u>
Type	<u>OffloadInfoType</u>
Usage	<u>OPTIONAL, MAY be used once and only once</u>

<u>Definition</u>	<u>Information about the Offload state for various modes of transport (Ambulance, Air Ambulance)</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>
<u>Requirements Supported</u>	<u>Requirement Numbers 1, 3, 4, 6, 11, 17, 18</u>

611

<u>Element</u>	<u>traffic</u>
<u>Type</u>	<u>TrafficType</u>
<u>Usage</u>	<u>OPTIONAL, MAY be used once and only once</u>
<u>Definition</u>	<u>Ability of this emergency department to receive patients via emergency medical services.</u>
<u>Comments</u>	• <u> </u>
<u>Constraints</u>	• <u> </u>

645

5 Conformance

5.1 Conformance Targets

The two following conformance targets are defined in order to support the specification of conformance to this standard:

- EDXL-HAVE Message; and
- EDXL-HAVE Message Producer.

An EDXL- HAVE Message is an XML 1.0 element whose syntax and semantics are specified in this standard. An EDXL- HAVE Message Producer is a software entity that produces EDXL- HAVE Messages.

NOTE There is no conformance target corresponding to the consumers of EDXL- HAVE messages

5.2 Conformance as an EDXL-HAVE Message

An XML 1.0 element is a conforming EDXL-HAVE-v2.0 Message if and only if:

- it meets the general requirements specified in Section 4;
- if its namespace name is "urn:oasis:names:tc:emergency:edxl:have:2.0", and the element is valid according to the schema ~~located at <http://docs.oasis-open.org/emergency/edxl-have-v2.0/edxl-have-v2.0.xsd>~~ in the "Additional artifacts" noted on the front page of this specification
- if its namespace name is "urn:oasis:names:tc:emergency:edxl:have:2.0", then its content (which includes the content of each of its descendants) meets all the additional mandatory requirements provided in the specific subsection of Section 4 corresponding to the element's name.

Note: only messages that fully comply with the EDXL-HAVE 2.0 specification and that are complete and schematically valid may be referred to as ~~a~~an "EDXL-HAVE 2.0 Message".

Appendix A. Data Dictionary

5.15.3 The following PDF is generated from the formal Conformance as an EDXL-HAVE 2.0 Schema Message Producer

A software entity is a conforming EDXL-HAVE Message Producer if and only if it is constructed in such a way that any XML 1.0 element produced by it and present in a place in which a conforming EDXL- HAVE message is expected (based on contextual information) is indeed a conforming EDXL- HAVE message according to this standard.

NOTE The ~~PDF~~ condition above can be satisfied in many different ways. Here are some examples of possible scenarios:

- a standard distribution protocol (say, EDXL-DE) transfers EDXL- HAVE messages; a resource consumer has sent a request message for an EDXL-HAVE report message to a Hospital system which claims to be a conforming EDXL- HAVE Message Producer, and has received an EDXL-DE message which is therefore expected to carry a conforming EDXL- HAVE Message;
- a local test environment has been set up, and the application under test (which claims to be a conforming EDXL- HAVE Message Producer) has the ability to produce an EDXL- HAVE message and write it to a file is available in the “schemas” in a directory listed in the “Additional artifacts” section on in response to a request coming from the title page testing tool; the testing tool has sent many requests to the application under test and is now verifying all the files present in the directory, which is expected to contain only conforming EDXL- HAVE Messages.

Schema(s)

Main schema edxl-have-v2.0-csd01.xsd

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0				
Annotations	<p>Specification Name: EDXL Hospital Availability Exchange (HAVE) 2.0 Description: Defines the XML schema for the EDXL HAVE message exchange Produced by: Emergency Management HAVE Subcommittee URL: http://docs.oasis-open.org Version: 2.0 WD Status: SC DRAFT Copyright: 2012-2015, OASIS, http://www.oasis-open.org Last Modified: 05JAN2015 Last Modified by: Darrell O'Donnell, P.Eng.</p> <p>Guiding Concepts/Principles: Schema Validation: should provide deep validation capabilities as opposed to being a basic schema where different groups make up extensions to the point where nothing is valid in between systems. Extensible: Key areas of the schema should support extensibility in a controlled manner. The use of managed taxonomies can allow a group to define a new set of services that are used in a network for example. Simple: Though the standard could support aggregation the provision of individual facility elements REVIEW: new elements ID and IDREF: References (IDREF) to unique elements (ID) should be used, especially where establishing of a hierarchy.</p>

Namespace	urn:oasis:names:toc:emergency:edxl:have:2.0
Annotations	General comment/summary on the all of the future services
Diagram	 The diagram shows a box for 'comment' with 'Type: FreeTextType'. It is connected to a circle containing a green 'x' (mandatory), which then points to a box for 'FreeTextType'. This box contains two sub-elements: 'defaultText' (Type: LimitedString) and 'alternateText' (Type: AlternateTextType). A note for 'defaultText' says 'The text value that uses the message default language (defined as in the HAVE message defaultLanguage attribute)'. A note for 'alternateText' says 'Alternate language representation.'.
Type	FreeTextType
Properties	content complex minOccurs 0 maxOccurs 1
Model	defaultText, alternateText*
Children	alternateText, defaultText
Instance	<pre><comment xmlns="urn:oasis:names:toc:emergency:edxl:have:2.0"> <defaultText>{1,1}</defaultText> <alternateText language="*">{0,unbounded}</alternateText> </comment></pre>

Element FacilityType / activityInPeriod

Namespace	urn:oasis:names:toc:emergency:edxl:have:2.0
Annotations	Provides a set of summaries of activity that has occurred in the indicated reporting period. This item is intended to provide a very high-level summary of facility activity.

Diagram							
Type	ActivityInPeriodType						
Properties	<table border="1"> <tr> <td>content</td> <td>complex</td> </tr> <tr> <td>minOccurs</td> <td>0</td> </tr> <tr> <td>maxOccurs</td> <td>unbounded</td> </tr> </table>	content	complex	minOccurs	0	maxOccurs	unbounded
content	complex						
minOccurs	0						
maxOccurs	unbounded						
Model	reportingPeriod(0,1), admissions, discharges, deaths, comment(0,1)						
Children	admissions, comment, deaths, discharges, reportingPeriod						
Instance	<pre><activityInPeriod xmlns="urn:oasis:names:toc:emergency:edxl:have:2.0"> <reportingPeriod>(0,1)</reportingPeriod> <admissions>(1,1)</admissions> <discharges>(1,1)</discharges> <deaths>(1,1)</deaths> <comment>(0,1)</comment> </activityInPeriod></pre>						

Element ActivityInPeriodType / reportingPeriod

Namespace	urn:oasis:names:toc:emergency:edxl:have:2.0				
Annotations	The time period (From -> To) that the activity occurred in. If this element is not included the reportingPeriod at the Facility level should be assumed to define the time range.				
Diagram					
Type	ct:TimePeriodType				
Properties	<table border="1"> <tr> <td>content</td> <td>complex</td> </tr> <tr> <td>minOccurs</td> <td>0</td> </tr> </table>	content	complex	minOccurs	0
content	complex				
minOccurs	0				
Model	ct:fromDateTime, ct:toDateTime				
Children	ct:fromDateTime, ct:toDateTime				
Instance	<pre><reportingPeriod xmlns="urn:oasis:names:toc:emergency:edxl:have:2.0" xmlns:edxl- ct="urn:oasis:names:toc:emergency:edxl:ct:1.0"> <edxl-ct:fromDateTime>(1,1)</edxl-ct:fromDateTime> <edxl-ct:toDateTime>(1,1)</edxl-ct:toDateTime> </reportingPeriod></pre>				

</reportingPeriod>

Element ActivityInPeriodType / admissions

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Annotations	Number of admissions in the period.		
Diagram			
Type	xs:int		
Properties	content	simple	
	minOccurs	1	
	default	0	

Element ActivityInPeriodType / discharges

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Annotations	Number of Discharges in the period.		
Diagram			
Type	xs:int		
Properties	content	simple	
	minOccurs	1	
	default	0	

Element ActivityInPeriodType / deaths

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Annotations	Number of Deaths in the period.		
Diagram			
Type	xs:int		
Properties	content	simple	
	minOccurs	1	
	default	0	

Element ActivityInPeriodType / comment

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Annotations	General comment/summary of the activity in period.		
Diagram			

Type	FreeTextType				
Properties	<table> <tr> <td>content</td><td>complex</td></tr> <tr> <td>minOccurs</td><td>0</td></tr> </table>	content	complex	minOccurs	0
content	complex

Model	defaultText, alternateText*				
Children	alternateText, defaultText				
Instance	<pre><comment xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <defaultText>(1,1)</defaultText> <alternateText language="*">(0,unbounded)</alternateText> </comment></pre>				

Element FacilityType / operations

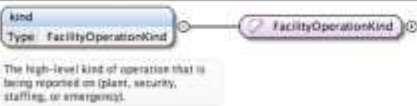

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0				
Annotations	Provides a taxonomy-based list of operations that describe the operations of the Facility.				
Diagram					
Type	OperationsType				
Properties	<table> <tr> <td>content</td><td>complex</td></tr> <tr> <td>minOccurs</td><td>0</td></tr> </table>	content	complex	minOccurs	0
content	complex				
minOccurs	0				
Model	operations*, comment{0,1}				
Children	comment, operation				
Instance	<pre><operations xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <operation>(1,unbounded)</operation> <comment>(0,1)</comment> </operations></pre>				

Element OperationsType / operation

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	Operation that facility provides in the context of key areas such as Clinical Operations, Security Operations, Facility Operations.

Diagram		
Type	OperationType	
Properties	content	complex
	minOccurs	1
	maxOccurs	unbounded
Model	kind, name, status, comment(0,1), extension*	
Children	comment, extension, kind, name, status	
Instance	<pre><operation xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0" xmlns:ext="urn:oasis:names:tc:emergency:edxl:extension:1.0"> <kind>(1,1)</kind> <name>(1,1)</name> <status>(1,1)</status> <comment>(0,1)</comment> <extension>(0,unbounded)</extension> </operation></pre>	

Element OperationType / kind

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Annotations	The high-level kind of operation that is being reported on (plant, security, staffing, or emergency).		
Diagram			
Type	FacilityOperationKind		
Properties	content	simple	
Facets	enumeration	plant	Plant - the key equipment and capabilities needed to operate the facility (e.g. HVAC, cafeteria).
	enumeration	security	Security operations for facility (e.g. patrol, surveillance).
	enumeration	staffing	Staff-related operations (e.g. medical personnel, support staffing, administrative).
	enumeration	emergency	Emergency Department operations.

Element OperationType / name

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
-----------	--

Annotations	The name of the operation that is being reported on (e.g. "Food Services").
Diagram	
Type	FreeTextType
Properties	content complex
Model	defaultText, alternateText*
Children	alternateText, defaultText
Instance	<pre><name xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <defaultText>(1,1)</defaultText> <alternateText language=" " (0,unbounded)</alternateText> </name></pre>

Element OperationType / status

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	The status of the Operation.
Diagram	
Type	StatusType
Properties	content complex
Model	isOK, colourStatus {0,1}, stability {0,1}, comment {0,1}
Children	colourStatus, comment, isOK, stability
Instance	<pre><status xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <isOK>(1,1)</isOK> <colourStatus>(0,1)</colourStatus> <stability>(0,1)</stability> <comment>(0,1)</comment> </status></pre>

Element OperationType / comment

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	General comment/summary on the Operation.

Diagram					
Type	FreeTextType				
Properties	<table border="1"> <tr> <td>content</td><td>complex</td></tr> <tr> <td>minOccurs</td><td>0</td></tr> </table>	content	complex	minOccurs	0
content	complex				
minOccurs	0

Children	resourceNeed
Instance	<pre><needs xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <resourceNeed>(1,unbounded)</resourceNeed> </needs></pre>

Element ResourceInformationType / needs / resourceNeed

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Diagram	
Type	ResourceQuantityType
Properties	content: complex maxOccurs: unbounded
Model	resourceKind, quantity, resourceSize, comments{0,1}
Children	comments, quantity, resourceKind, resourceSize
Instance	<pre><resourceNeed xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <resourceKind>(1,1)</resourceKind> <quantity>(1,1)</quantity> <resourceSize <Path="">(1,1)</resourceSize> <comment>(0,1)</comment> </resourceNeed></pre>

Element ResourceQuantityType / resourceKind

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	The kind (type) of resource that the quantity refers to. TODO: Provide the URI and key-value.

Diagram	
Type	ct:ValueKeyType
Properties	content complex
Model	ct:ValueListURI, ct:value
Children	ct:value, ct:ValueListURI
Instance	<pre><resourceKind xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0" xmlns:edxl-ct="urn:oasis:names:tc:emergency:edxl:ct:1.0"> <edxl-ct:ValueListURI {1,1}</edxl-ct:ValueListURI> <edxl-ct:value>{1,1}</edxl-ct:value> </resourceKind></pre>

Element ResourceQuantityType / quantity

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	The quantity of the particular Resource.
Diagram	
Type	restriction of xs:double
Properties	content simple
Facets	minInclusive 0

Element ResourceQuantityType / resourceSize

Namespace	urn:oasis:names:tc:emergency:eddx:have:2.0								
Annotations	Unit of measure and size (e.g. 1500 mL).								
Diagram	<p>The diagram illustrates the structure of the <code>resourceSize</code> element. It is a complex type derived from <code>ext:ParameterNameType</code>. The <code>resourceSize</code> element has an attribute <code>resourceSize</code> of type <code>ext:ParameterNameType</code> and a child element <code>ext:ParameterNameType</code>. The child element <code>ext:ParameterNameType</code> contains an attribute <code>xs:anyURI</code> and a child element <code>Attributes</code>. The <code>Attributes</code> element contains an attribute <code>xPath</code> of type <code>xs:string</code>.</p>								
Type	ext:ParameterNameType								
Properties	content	complex							
Attributes	<table><thead><tr><th>QName</th><th>Type</th><th>Use</th></tr></thead><tbody><tr><td>xPath</td><td>xs:string</td><td>optional</td></tr></tbody></table>	QName	Type	Use	xPath	xs:string	optional		
QName	Type	Use							
xPath	xs:string	optional							

Element ResourceQuantityType / comments

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	Textual description of Resource quantity.

Diagram		
Type	FreeTextType	
Properties	content	complex
	minOccurs	0
Model	defaultText, alternateText*	
Children	alternateText, defaultText	
Instance	<pre><comments xmlns="urn:oasis:names:tc:emergency:edxl:have:2.0"> <defaultText>(1,1)</defaultText> <alternateText language="*">(0,unbounded)</alternateText> </comments></pre>	

Element ResourceInformationType / offers

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Annotations	Resource Offers (resources that can be made available to other Facilities).	
Diagram		
Properties	content	complex
	minOccurs	0

Element TriageCountType / count

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	The number of patients of this code type.
Diagram	
Type	restriction of xs:int
Properties	content simple
Facets	minInclusive 0

Element TriageCountType / alternateCodeValue

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0
Annotations	There are a large number of Triage systems in use. Many use numbering systems (http://en.wikipedia.org/wiki/Triage#Tags) and colours. The premise of HAVE is that we will share the general state with the broad emergency management community who may not know the intimate details of a triage system, but understand the general concepts that RED=urgent, Green=walking wounded, Black=Dead/Lost (already dead or unrescuable). The alternateCodeValues element is intended to be used by these systems. Providing the ValueListURI and Value will allow mapping of external systems to the base HAVE Triage colour codes.
Diagram

Facets	enumeration	<p>plant</p> <p>Plant - the key equipment and capabilities needed to operate the facility (e.g. HVAC, cafeteria).</p>

	enumeration	security	Security operations for facility (e.g. patrol, surveillance).
	enumeration	staffing	Staff-related operations (e.g. medical personnel, support staffing, administrative).
	enumeration	emergency	Emergency Department operations.
Used by:	Element	OperationType/kind	

Simple Type OffloadKind

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Diagram			
Type	restriction of xs:token		
Facets	enumeration	land	
	enumeration	air	
	enumeration	other	
Used by:	Element	OffloadType/kind	

Simple Type OffloadStateKind

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Diagram			
Type	restriction of xs:token		
Facets	enumeration	normal	
	enumeration	delayed	
Used by:	Element	OffloadType/offloadState	

Simple Type TrafficStatusKind

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Diagram			
Type	restriction of xs:token		
Facets	enumeration	normal	Traffic is at levels that are within norms.
	enumeration	advisory	Traffic levels are high enough to warrant notifying the community that the facility is experiencing higher than expected traffic.
	enumeration	closed	Facility is not accepting patient traffic.
Used by:	Element	TrafficType/status	

Simple Type TriageColourCodeType

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0		
Diagram			
Type	restriction of edxli-cs:EDXLSStringType		
Type hierarchy	<ul style="list-style-type: none"> xs:token 		

	<ul style="list-style-type: none"> • ct:EDXLSStringType • TriageColourCodeType 	
Facets	minLength	1
	maxLength	1023
	enumeration	red RED Triage - Immediate attention for Triage.
	enumeration	yellow YELLOW Triage - Needs medical attention after RED/Immediate.
	enumeration	green GREEN Triage - Walking wounded or self-treatable
	enumeration	black BLACK Triage - Lost/Dead
Used by	Element	TriageCountType/code

Simple Type TraumaCenterLevelKind

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0

Type	restriction of xs:string	
Facets	enumeration	Level1 Level 1 Trauma Services
	enumeration	Level2 Level 2 Trauma Services
	enumeration	Level3 Level 3 Trauma Services
	enumeration	no-trauma Level 4 Trauma Services
Used by	Element	TraumaCenterLevelType/serviceLevel

Attribute(s)

Attribute AlternateTextType / @language

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Annotations	Language code for the text in this element. Code MUST comply with RFC3066.	
Type	xs:string	
Properties	use:	required
Used by	Complex Type	AlternateTextType

Attribute GeoLocationType / wgs84Location / @srsName

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Properties	use:	required
	fixed:	http://www.opengis.net/def/crs/EPSG/0/4326
Used by	Element	GeoLocationType/wgs84Location

Attribute GeoLocationType / geoLocationExtended / @srsName

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Properties	use:	required
Used by	Element	GeoLocationType/geoLocationExtended

Attribute FacilityType / @ID

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Annotations	A unique identifier for this Facility. This value should be unique globally, but MUST be unique from the sender perspective.	

Type	xs:ID	
Properties	use:	required
Used by	Complex Type	FacilityType

Attribute **FacilityType** / **@parentID**

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Annotations	Reference to the ID of the Facility that is the parent (owner, manager, responsible, etc.) of this Facility. This field is optional and used to provide a hierarchy for formal facility organizations.	
Type	xs:IDREF	
Properties	content:	simple
Used by	Complex Type	FacilityType

Attribute **HAVE** / **@defaultLanguage**

Namespace	urn:oasis:names:tc:emergency:edxl:have:2.0	
Annotations	Language code that is used throughout the document. Code MUST comply with RFC3066. Free text within the document will be assumed to be in this defaultLanguage.	
Type	xs:string	
Properties	use:	required
Used by	Element	HAVE

Appendix B. Appendix A. Acknowledgments

The HAVE Subcommittee is Chaired by Darrell O'Donnell who has worked tirelessly and through holidays to bring this specification to the EM-TC for approval and advancement to a Standard under the close guidance of the OASIS process. He has been ably assisted by Brian Wilkins who has also participated intently to bring this work to conclusion. The following individuals have participated in the subcommittee creating this specification and are gratefully acknowledged:

Patti Aymond, IEM
Rex Brooks, Individual
Lizzie DeYoung, MITRE
Tom Ferrentino, Individual
Tim Grapes, Individual
Elysa Jones, Individual
Emily Laughren, MITRE
Donald McGarry, MITRE
Mark Prutsalis, Sahana Software Foundation
Rob Torchon, Individual
Brian Wilkins, MITRE

We are also grateful for the EM-TC participants for their oversight and guidance:

Doug Allport, Canadian Public Safety Operations Organization
David Askov, Pacific Disaster Center
Patti Aymond, IEM
Art Botterell, Individual
Rex Brooks, Individual
Robert Bunge, NOAA's National Weather Service
Yu Chen, Google Inc.
Eliot Christian, Individual
Toby Considine, University of North Carolina at Chapel Hill
William Cox, Individual
CAPAU Custodian, Australian Government Attorney-General's Department
Lizzie DeYoung, MITRE Corporation
Thomas Ferrentino, Individual
Mike Gerber, NOAA's National Weather Service
Timothy Grapes, Individual
Robert Gustafson, MITRE Corporation
Steve Hakusa, Google Inc.
Gary Ham, Individual
Werner Joerg, Individual
Elysa Jones, Individual
Michael Kristan, MITRE Corporation
Ram Kumar, Individual
Dominic König, Sahana Software Foundation
Emily Laughren, MITRE Corporation
Mark Lucero, US Department of Homeland Security
Donald McGarry, MITRE Corporation

801 Thomas Merkle, US Department of Homeland Security
802 Darrell O'Donnell, Individual
803 Camille Osterloh, Individual
804 Norm Paulsen, Environment Canada
805 Glenn Pearson, Sahana Software Foundation
806 Efraim Petel, AtHoc, Inc.
807 Tomer Petel, AtHoc, Inc.
808 Mark Prutsalis, Sahana Software Foundation
809 Carl Reed, Open Geospatial Consortium, Inc. (OGC)
810 Aviv Siegel, AtHoc, Inc.
811 Steve Streetman, US Department of Homeland Security
812 Robert Torchon, Individual
813 Richard Vandame, US Department of Homeland Security
814 Nuwan Waidyanatha, Sahana Software Foundation
815 Jeff Waters, US Department of Defense (DoD)
816 Jacob Westfall, Individual
817 Herbert White, NOAA's National Weather Service
818 Brian Wilkins, MITRE Corporation
819 Ka-Ping Yee, Google Inc.

Appendix ~~C~~. Appendix B. Revision History

Revision	Date	Editor	Changes Made
WD02	23DEC2014	Darrell O'Donnell	Preparation for submission to OASIS EM-TC
WD02	13JAN2015	Darrell O'Donnell	Updates to reflect RIM (CT, CIQ, and GSF) working drafts.
CSD01	13JAN2014 ⁵	Darrell O'Donnell	Updates to reflect EM TC Committee Specification Draft
<u>WD03</u>	<u>22AUG2017</u>	<u>Rex Brooks</u>	<u>Changes pursuant to new Committee Specification Public Review Draft</u>
