
Committee Specification 01

25 December 2019

This stage:

Previous stage:

Latest stage:

Technical Committee:
OASIS Open Document Format for Office Applications (OpenDocument) TC

Chairs:
Jos van den Oever (jos.vanden.oever@logius.nl), Logius
Patrick Durusau (patrick@durusau.net), Individual

Editor:
Patrick Durusau (patrick@durusau.net), Individual

Additional artifacts:
This prose specification is one component of a Work Product which includes:
Related work:
This specification replaces or supersedes:

Abstract:
This document is Part 1 of the Open Document Format for Office Applications (OpenDocument) Version 1.3 specification.

Status:
This document was last revised or approved by the OASIS Open Document Format for Office Applications (OpenDocument) TC on the above date. The level of approval is also listed above. Check the "Latest stage" location noted above for possible later revisions of this document. Any other numbered Versions and other technical work produced by the Technical Committee (TC) are listed at https://www.oasis-open.org/committees/tc_home.php?wg_abbrev=office#technical.

TC members should send comments on this specification to the TC's email list. Others should send comments to the TC's public comment list, after subscribing to it by following the instructions at the "Send A Comment" button on the TC's web page at https://www.oasis-open.org/committees/office/.

This specification is provided under the RF on Limited Terms Model of the OASIS IPR Policy, the mode chosen when the Technical Committee was established. For information on whether any patents have been disclosed that may be essential to implementing this specification, and any offers of patent licensing terms, please refer to the Intellectual Property Rights section of the TC’s web page (https://www.oasis-open.org/committees/office/ipr.php).

Note that any machine-readable content (Computer Language Definitions) declared Normative for this Work Product is provided in separate plain text files. In the event of a discrepancy between any such plain text file and display content in the Work Product’s prose narrative document(s), the content in the separate plain text file prevails.

Citation format:
When referencing this specification the following citation format should be used:

1 Introduction

1.1 IPR Policy
This specification is provided under the RF on Limited Terms Model of the OASIS IPR Policy, the mode chosen when the Technical Committee was established. For information on whether any patents have been disclosed that may be essential to implementing this specification, and any offers of patent licensing terms, please refer to the Intellectual Property Rights section of the TC’s web page (https://www.oasis-open.org/committees/office/ipr.php).

1.2 Scope
This standard specifies the characteristics of an XML-based application-independent and platform-independent digital document file format, as well as the characteristics of software applications which read, write and process such documents. This standard is applicable to document authoring, editing, viewing, exchange and archiving, including text documents, spreadsheets, presentation graphics, drawings, charts and similar documents commonly used by personal productivity software applications.

This standard has three parts.
Part 1 presents a master table of contents for parts 2 (packages), 3 (schema) and 4 (formulas). It also acknowledges the participation of all who made it possible.
Part 2 defines the package format language for OpenDocument documents.
Part 3 defines the XML schema for OpenDocument documents.
Part 4 defines the formula language for OpenDocument documents.

This standard, for illustrative purposes, describes functionality using terminology common in desktop computing environments that contain a display terminal, keyboard and mouse, attached to a computer hosting an operating system with a graphical user interface which includes user interface controls such as input controls, command buttons, selection boxes, etc.

However, this standard is not limited to such environments. The standard also supports the use of alternative computing environments, other form factors, non-GUI consumers and producers, and the use of assistive technologies, using analogous user interface operations.

1.3 Terminology
All text is normative unless otherwise labeled.

Within the normative text of this specification, the terms "shall", "shall not", "should", "should not", "may" and "need not" are to be interpreted as described in Annex H of [ISO/IEC Directives].

implementation-defined behavior: behavior that depends on the implementation and that each implementation shall document.

implementation-dependent behavior: behavior that depends on the implementation. The implementation is not required to document which behavior occurs.

Note: Usually, the range of possible behaviors is delineated by the Standard.

Undefined behavior: behavior for which the Standard imposes no requirements. Undefined behavior may also be expected when the standard omits the description of any explicit definition of behavior.
1.4 Normative References

The individual parts of the OpenDocument specification each defines its own set of normative references.

1.5 Non Normative References

None.

The individual parts of the OpenDocument specification may contain further non normative references.
Appendix A. Acknowledgments

The following individuals have participated in the creation of this specification and are gratefully acknowledged:

Participants:
Chieko Asakawa, IBM
Waldo Bastian, Intel Corporation
Thorsten Behrens, Novell
Nathaniel Borenstein, IBM
Michael Brauer, Oracle Corporation
Pete Brunet, IBM
Manuel Cano
Francis Cave, Individual
Suresh Chande, Nokia Corporation
Robin Cover, OASIS
Pierre Ducroquet
Jerome Dumonteil, Ars Aperta
Patrick Durusau
Cherie Ekholm, Microsoft Corporation
Ezer Farhi
David Faure
Jean Gouraine, Ars Aperta
Andreas J. Guelzow
Bettina Haberer, Sun Microsystems
Dennis E. Hamilton
Bart Hanssens, Fedict
Donald Harbison, IBM
Alfred Hellstern, Microsoft
Regina Henschel, The Document Foundation
Mingfei Jia, IBM
Bob Jolliffe
Peter Junge
Kazmer Koleszar, MultiRacio Ltd.
Peter Korn, Oracle Corporation
Jirka Kosek
Robin LaFontaine
Marcus Lange, Sun Microsystems
David LeBlanc, Microsoft
Fong Lin, Novell
Jun Ma, Beijing Redflag Chinese 2000 Software Co., Ltd.
Yue Ma, IBM
John Madden, Duke University
Doug Mahugh, Microsoft Corporation
Ben Martin, KDE e.V.
James Mason, ISO/IEC JTC1/SC34
Rich McLain, Microsoft
Tristan Mitchell
Duane Nickull, Adobe Systems
Michael Paciello
Ganesh Paramasivam, KDE e.V.
Eric Patterson, Microsoft Corporation
David Pawson
Steven Pemberton, Stichting Centrum voor Wiskunde & Informatica
Stephen Peront, Microsoft Corporation
